PREPARATION OF MANUSCRIPTS FOR PUBLICATION IN THE OHIO JOURNAL OF SCIENCE

The following suggestions are presented in order to minimize revisions and editorial corrections. Uniformity of style and format dictates attention to detail by authors.

STYLE. Recent issues of the Journal should be examined so that authors become familiar with its general style. Manuscripts should be neatly typewritten on 81/2"x11" inch paper with wide margins and double-spacing throughout. Pages should be numbered consecutively. Extensive quotations in the text should be typed with slightly wider margins. Words and numerals to appear in italics should be underlined in the typed copy. Acceptable symbols should be used for units of measurement; e.g., see Style Manual For Biological Journals, compiled by the Conference of Biological Editors of the American Institute of Biological Sciences, 2000 P Street N. W., Washington D. C., 20006.

Title is to be typed in capital letters. Scientific names of organisms in the title should be underlined. The author's name should be typed in capital letters below the title. The address of the department, institution, city and state which are to be credited with supporting the author and his work should be typed (caps and lower case) below the author's name and underlined. If more than one institution is to be credited, their names should appear in the order corresponding with the authors' names.

Main headings are to be typed in capital letters, centered and not followed by a period; secondary headings are to be typed in lower case with the initial letter of main words capitalized and each word in the heading underlined. Tertiary headings appear at the beginning of a paragraph, followed by a period and a dash.

TABLES. Tables are to be typed, double-spaced, on separate sheets of paper, one table to a page, numbered consecutively, and placed in a group at the end of the manuscript. Keep the number of tables at a minimum; numerous small tables especially should be avoided. When the headings for a number of tables are similar, an attempt should be made to avoid repeating names thereby saving valuable space. The same headings, e.g., a double horizontal line immediately below the title of the table and a single horizontal line below the column headings and at the bottom of the table. Do not use horizontal lines in the interior of the table and use no vertical lines. Tables should be planned and prepared with proper spacing so that such lines are not necessary.

Footnotes to tabular data should be noted by asterisks, daggers, or other signs to avoid confusion with numerals in the table or elsewhere. The general style desired in tables can be seen by examining recent issues of the Journal.

The position of the tables in the text as preferred by the author should be indicated on the galley proof. Tables are referred to in the text as "table 1" or "(table 1)."

ILLUSTRATIONS. All illustrations are referred to as "figures" and must be numbered consecutively. They may be photographs or line drawings in black India ink. As many as possible of the illustrations should be grouped and mounted close together on heavy white cardboard, for reproduction grouped as a single cut is most economical. Each figure or collection of figures in a plate should be identified along the bottom edge with author's name, figure number, and size after reproduction, and on the back with author's name and title of manuscript. Use of illustrations not original with the author must bear permission for use and credit to the originator.

Make the size and proportions of each group of illustrations suitable for reduction to the width of the printed page (5") and any portion of the length (71/4"). Care should be taken to insure that a figure does not occupy any more space than necessary. Excessive white space should be eliminated. Line drawings for reproduction are often made too large. As a general rule the dimensions should be no greater than 9 X 15 inches. If carefully drawn they need be no more than 60 percent larger than the size desired when in print. Special care should be taken to insure that all lettering is large enough to be read after reduction. A graphic scale should be drawn on each figure to automatically indicate the size of the original regardless of reduction. Original drawings should be submitted for making engravings. In addition to the original illustrations, two photographic copies of each (no larger than 81/2"x11" inches) must accompany the manuscript to avoid delay in review.

Footnotes to tables are permissible as described above. Reference to the literature is not permitted as footnotes but must be handled as described below. Acknowledgments are incorporated in the regular text at the end of the summary, just before Literature Cited.

REFERENCES or LITERATURE CITED. References to scientific literature should be accumulated in a list arranged in alphabetical order by author's name, double-spaced, on separate sheets of paper, and typed, if necessary, for the convenience of the printer. They should not be numbered. The page should be entitled REFERENCES or LITERATURE CITED, typed in caps and centered. Examine recent issues of the Journal for the detailed form. References are referred to in the text as "(Patterson, 1940)" or "Patterson, 1940." In case of more than two authors, "et al." may be used in the text, but all coauthors must be listed in the reference section. Total number of pages should be given for books.

ABSTRACTS. The abstract should be a concise summary of the significant facts contained in the paper. It should be self-sufficient within itself, setting the main conclusions of the paper, any new compound, species, or mineral, etc., described, and any new methods or procedures critical to the results presented in the paper. It should be brief and concise, not over 250 words and preferably shorter, but complete sentences should be used to promote comprehension and emphasis. Words should be handled as "are presented" or "is explained" should be avoided. Abstracts are not to contain illustrations, tables, references, or footnotes.
OHIO ACADEMY OF SCIENCE PUBLICATIONS

LABORATORY MANUAL FOR PLANT ANATOMY, Richard A. Popham, 228 pp., is available in quantities for classroom use from the Ohio Academy of Science, 445 King Avenue, Columbus, Ohio 43201.

ANNOTATED LIST OF THE BIRDS OF OHIO. Milton B. Trautman and Mary A. Trautman. Reprinted from The Ohio Journal of Science Vol. 68, No. 5, September, 1968 pp. 257-332. Single copy $1.00; 10 or more, 80¢ each.

ENERGETICS AND FITNESS SYMPOSIUM. 64 pp. is available at $3.50 from the Ohio Academy of Science office.

DATES TO REMEMBER

The Ohio Academy of Science 1976 Annual Meeting will be held April 22-24, 1976, at Miami University. Contact Dr. John Thompson, Geography Department, Miami University, Oxford, Ohio 45056.

The 11th Annual History of Science meeting is scheduled for April 3, 1976 at the Ohio Historical Center, Columbus, Ohio.
