ANIMALS IN THE CLASSROOM WORKSHOP

Sponsored by: OSEA - The Ohio Scientific, Education and Research Association; The Pennsylvania Society for Biomedical Research; The Ohio Academy of Science; and The Ohio State University

Thursday, April 28, 1993
6:00 - 9:00 p.m.
Friday, April 29, 1993
8:30 a.m. - 4:00 p.m.

Youngstown State University
Cushwa Hall B079
Margaret Snyder, Presiding

Program Benefits

1. The principles of vertebrate biology essential for the humane care and use of animals in education and students research.
2. Federal and State regulations governing the use of animals.
3. Ethical considerations for the use of animals.
4. Current literature and policies for the use of animals in education and students research.
5. Alternative strategies to the use of live animals in education.
6. Cultural differences and the ethical concerns in education.
7. The role of vertebrates in the education of students in education.
8. The educational and ethical implications of the use of vertebrates in education.
9. The importance of vertebrates in the education of students in education.
10. The educational and ethical implications of the use of vertebrates in education.

The education and research communities are currently being challenged to consider the use of animals in education. This need for careful consideration is supported by continuing advances in alternative techniques such as computer models, simulations, and other minimizing the use of animals. The need to balance ethical and educational concerns is again being addressed as animal rights advocates challenge the use of animals in education.

The Ohio Academy of Science Workshop on April 29-30, 1993 on the humane care and use of animals in education will provide an opportunity for animal science educators to explore the ethical, legal, and educational issues that will be of interest to the people who use vertebrates in their education.

The workshop will consist of presentations by animal science educators, animal rights advocates, and ethicists.

One of the goals of this workshop is to foster a better understanding of the ethical and educational issues associated with the use of vertebrates in education.

The workshop is open to animal science educators, animal rights advocates, and ethicists who are interested in the use of vertebrates in education.
