The Ohio State University Student Chapter of the American Institute of Chemical Engineers exists for the purpose of promoting professional fellowship, and also pleasant social and athletic relationships among its members. Any person enrolled in or majoring in Chemical Engineering at the Ohio State University is eligible for membership. The organization sponsors professional talks, various athletic activities, and the Chemical Engineers' Roundup. It also maintains a representation in the Engineers' Council. Each year the national organization, the American Institute of Chemical Engineers, through the student chapter, gives an award to the Sophomore in Chemical Engineering who had the highest scholastic standing for his Freshman year.

Page 10 The Ohio State Engineer
The American Society of Civil Engineering was organized on Ohio State's campus in 1922. A group of six members adopted a constitution which helped to direct the business of the student society. The organization not only makes it possible for the students to learn the latest developments in the field of Civil Engineering but it also helps to promote a feeling of sociability among them. Each month a meeting is held to which a distinguished speaker is invited to give an address to the members.

The American Society of Mechanical Engineers is the parental branch of the local organization of the same name. The national society is one of the largest scientific bodies of the world and the Student Branch at Ohio State is the most active branch of the organization. The main purpose of the Student Branch is to prepare the engineers for entrance to the senior group. In order to do this, each engineer is expected to give a short talk before an assembly on some technical subject with which he is acquainted.

The Engineering Council was organized in 1922 to bring about better cooperation among the engineering students on the campus. Each of the nine departments in the college of engineering sends two representatives, chosen by election, to the council. In addition, there is a representative from the council on Ohio State Engineer, engineering organ, and the Student Senate. The council sponsored three major projects this year, the engineering debate, banquet, and Engineers' Day.

May, 1934
This honorary society was founded at Lehigh University, June 1885. Its purpose is to confer distinction upon students who have obtained a high grade of scholarship in the College of Engineering, and also to foster a spirit of liberal culture in the engineering students. There are 62 active chapters, with a total membership of over 22,000. Each year the chapter presents a slide rule to the sophomore in Engineering who, as a freshman, had the highest point ratio.
