WHEN you enter the practice of the profession of engineering you will, without a doubt, require a more detailed knowledge of the oxy-acetylene process of welding, cutting, and heat-treating of metals than you will carry away with you from college.

No matter where you locate, we invite you to consult Linde whenever you need assistance in problems involving the use of welding, cutting, flame hardening, flame softening, hard-facing or any other application of the oxy-acetylene process. There are 32 Linde offices in principal cities throughout the country.

Such assistance as this is made available to users of Linde products through the medium of Linde Process Service. The purpose of this service is to help consumers obtain the greatest possible value from every dollar spent for Linde oxygen—and everything else bought from Linde. Write or call the nearest Linde office for full information.

THE LINDE AIR PRODUCTS COMPANY
Unit of Union Carbide and Carbon Corporation

New York and Principal Cities
In Canada: Dominion Oxygen Company, Limited, Toronto

Everything for Oxy-Acetylene Welding and Cutting

The words "Linde," "Prest-O-Lite," "Oxweld" and "Union" used herein are registered trade-marks.
