AN UNUSUAL HOPEWELL PENTAGONAL PENDANT

by
Mark and Ned Shaw
New Holland, OH

Pictured is an unusual Hopewell Pentagonal Pendant. It is unusual in that it has been drilled twice and it is made of hematite or a similar iron based mineral. Robert N. Converse states in Ohio Slate Types that pentagonal pendants are rarely made from anything other than banded slate. This pendant is 4 1/8 inches long and was originally found in Ross County, Ohio. From the collection of Ned and Mark Shaw, New Holland, Ohio.
