The Academy is the common meeting ground of the scientific activities of the State.

OBJECTIVES & MEMBERSHIP

The Ohio Academy of Science is a nonprofit *membership organization* founded in 1891 to stimulate interest in the sciences, to promote research, to improve instruction in the sciences, to disseminate scientific knowledge and to recognize high scientific achievements.

The Academy's legislative body is a council of officers, committee chairmen and technical section representatives. The Executive Committee administers Academy affairs through a professional staff. Members enroll in technical sections of their choice. Sections are managed by officers who arrange annual meeting programs and other activities. Members have voting privileges in their section and may attend any program sessions.

Anyone interested in science may join. Individual members are employed by research laboratories, universities, colleges, governmental agencies, technical institutes, high schools, elementary schools, businesses, industries, trade and professional associations, museums, arboreta and nature centers in Ohio, other states and foreign countries. Members who have made significant contributions to science may be elected Fellows.

Additional annual support comes from corporate and institution members and The Friends of The Ohio Academy of Science. Special projects are supported by grants and gifts from individuals, corporations, foundations, state and federal government and service organizations.

ACTIVITIES

The Annual Meeting, held on a different university campus each year, is a smorgasbord of scientific delights ranging from the presentation of over 250 papers and addresses, to a banquet, business meeting, field trips and exhibits.

The Junior Academy Program is maintained to discover interest and ability in science among high school students through the progressive development of science projects at local, district and state science days. The Junior Academy **Section** gives high school students full membership privileges in the Academy.

Krecker Awards, financially supported by Battelle Memorial Institute since 1962, annually recognize quality science education programs in high schools.

Acker Outstanding Teacher Awards, supported by the Jerry Acker Memorial Fund, annually recognize the work of Ohio's finest science and math teachers.

The Ohio Science, Engineering and Technology Program helps state government officials use science and technology resources in public policymaking.

The Ohio Science Day Alumni Club unites former science day participants for the support and development of the Academy.

National Leadership comes by participation in the American Association for the Advancement of Science, National Association of Academies of Science and the American Junior Academy of Science.

International Activities include publishing, international symposia, scholarly exchanges and support of the International Council of Mid Ohio.

Other Activities include history of science meetings and ecology symposia. Committees are assigned to provide research grants to students, prepare an Ohio Flora, develop publications, and work in other areas of current interest to the membership.

PUBLICATIONS

Members receive *The Ohio Journal of Science*, a multidisciplinary technical publication issued six times a year, plus an April Annual Meeting Program Abstracts issue. The *Journal* is sent to subscribers in nearly all states and in nearly sixty foreign countries. It is abstracted and indexed by *Current Contents*, *Chemical Abstracts* and *Biological Abstracts*.

Other publications include the *OAS NEWS* for science education, the *OASIS* newsletter, environmental guides, *Technical Writing Style Guide*, *Proposal Guide*, *Ohio Bird List*, special papers, and *Ohio's Natural Heritage* book.
