INSTRUCTIONS TO AUTHORS — inside back cover

COVER PHOTO: Cabernet Sauvignon grapevines at Markko Vineyard, Conneaut, OH. Buds of these premium wine grapes and other fruits such as peaches are vulnerable to winter cold damage in Ohio. Tender fruit crops are grown along the Lake Erie shore where extreme cold is less common but record temperatures of -29°C (-20°F) in January 1994 killed grape buds in these vineyards. Author Dennis Edgell describes the Climatology of extreme winter cold in Ohio (pp. 41-54).
