### INSTRUCTIONS TO AUTHORS — inside back cover

COVER PHOTO: Aaron's Rod or Bush Pea, *Thermopsis villosa*, has previously been unreported in Ohio (see Brief Note on page 34). A perennial legume, it is found growing in well drained soils and open, sunny places. It occurs in eastern North America from Newfoundland to Alabama along the coast, as well as in Tennessee. This species has broad clasping stipules and yellow papilionaceous flowers occurring in terminal racemes. The entire plant is villous, with long soft hairs. This picture was taken in Geauga County in June 2005 in a dry, vacant lot beneath power lines where the species occurs in a large clump. (Photo courtesy of Brian Gilbert, Cleveland, OH).
