		A. W. Seabright .....	Mine E., '20		

## EDITORIAL

In this number of the Ohio State Engineer appear articles which were given as addresses at the meeting of the Ohio Association of Technical Engineers and Architects held in October at Columbus, Ohio. These addresses were made by men who are nationally famous in the Engineering profession.

The substance of these articles is so timely and of such great importance that The Ohio State Engineer deems it highly advisable to give these articles the greatest possible publicity. All of the addresses, five in number, are given in complete form in this issue.

To further acquaint our readers with the authors a short sketch of each will be given.

### *Lessons of the War in Relation to the Government's Business.*

By Mr. M. O. Leighton, Consulting Engineer, Washington, D. C., Chairman of Engineers, Architects' and Constructors' Conference of the National Department of Public Works and also Chairman of the National Service Committee of Engineering Council.

### *"Relation of the Engineer to the Employer."*

By Mr. William Beahan, Engineer with the New York Central Lines stationed at Cleveland.

### *"Co-operation Among Engineers and Architects."*

By Dr. Frederick H. Newell, head of Department of Civil Engineering, University of Illinois, and President of the American Association of

Engineers, Chairman of Committee or Engineering Co-operation. Former director of U. S. Reclamation Service.

### *"Compensation of Engineers and Architects."*

By Mr. Charles Whiting Baker, Consulting Editor of Engineering News Record, Member of Committee of Engineering Council on Compensation. This Committee has been collecting and compiling data for several years on this subject, and Mr. Baker is in a position to present this subject in a most complete manner.

### *"Registration of Engineers and Architects."*

By Mr. Gardner S. Williams, Consulting Engineer, Ann Arbor, Michigan, ex-Vice President, American Society of Civil Engineers. Mr. Williams has been prominently identified with the movement which has recently resulted in the passage of a registration law in Michigan.

### **To the Freshmen Engineers.**

In the last issue of The Ohio State Engineer an editorial appeared suggesting to the various Student Engineering Societies that they make an especial effort to get the Freshmen Engineering students to be present at their meetings and to take part in their activities. Steps have been taken by the Engineering Societies to accomplish this and if you have not been approached you are one of those who have been unintentionally overlooked. Student Engineering Societies exist for each of the seven Engineering Departments and

all Engineering Students are eligible for membership. It is of great value to become associated with the society, representing your type of Engineering early in your college career, because in that manner you become acquainted with the upper-classmen who will go out in the profession before you leave college and by this means your acquaintance with members of your profession

will be greatly augmented. If you are not affiliated with one of these Student Engineering Societies decide which one represents the type of Engineering you may desire to follow and join it at once. Upper-classmen will be very glad to give you any information you may desire. Freshmen let's put this across and put it across big—  
**JOIN AT ONCE.**
