THE ENGINEER'S EXHIBIT

HERE are three events which will stand out in the annals of the Engineering College under the head of 1921-1922. The one we now remember is the first annual Engineers' Roundup. Next will be the All-Engineers' Dance to be held in the Armory on April 7, and, last but foremost, is the Engineers' Exhibit. The date set for this exhibit is May 25 and 26. Already plans are being laid to make this the biggest event in the history of the College.

The plan as laid out is that each Department shall present a display representative of their own branch of engineering. The committee in charge is making arrangements with manufacturers throughout the state whereby they will be given an opportunity to exhibit construction and engineering machinery of all kinds. A number of spectacular performances are being arranged by the several Departments. The nature of these will not be made known, due to the fear

that the campus will not be able to accommodate the crowds which would result from such a disclosure.

A special feature of the program is an outdoor movie house. The east side of Brown Hall will be the screen and the entire campus the auditorium. The films shown will be of an engineering nature, such as the inside of large industrial plants, hydro-electric construction, the oil industry and views of nationally reputed projects.

At this time we will be entertaining representative men from all the prominent High Schools of the state, visitors from the Big Six Colleges and possibly a few angels unawares. We expect the city of Columbus and neighboring towns to turn out en masse.

Nothing is worth doing unless it's worth doing well. Let's all get in and show the state that the Engineering College of Ohio State University is on the map for good.
