# QUADRANGLE QUIPS

By THE CAMPUS CAPERER, Com. 5

Theta Tau glamor boy **Ivan Spraitzar** certainly tried to wax his charms on **Helen Knapp**, A. C. C. candidate for Homecoming Queen. **Miss Sophie Uri**, **Hilda Hall's** candidate for Homecoming Queen, and plenty smooth, is a freshman in ceramics. **Tom Zaugg** spends his every week-end in Findlay with "that" girl. **Mr. Bob Salter**, how do you get your machine design problems done at the "Palms"? **John "Killer" McAfee**, M. E. man about town, aroused the ire of the Alpha Zeta Delt girls to such a pitch that they had a "We Hate Johnny Nite." **Rollin Smith** is a campus bachelor—reason being that he is an off-campus husband. The **Beta Pi** boys always have trouble lining up dates for their so called meetings—why? **Don Postlewaite** and **Bill Parker** saw the first half of the Ohio-Minnesota game—that's all! **Wayne Kuhn** took a date to a Beta Pi party, but saw little of her, so **Traverse Nelson** took over. **Jim Robinson** chased all over town to get his Chi O date, down in Lexington at Tau Beta Pi convention. No wonder—her name was **Belinda Moss**.

**Edith Andregg**, Engineer's Day Queen last year, is working in her father's plant in Newark, but expects to return to school soon. **Dick "Slick" Feren** took a temporary fancy to **Anne Kabealo**, sister of former "Buck" gridiron "greats". The I. E.'s have a unique football team this year consisting of 4 backfield and **Al Monas** (that's enough) on the line. **Joe Selby**, Met. 4, was surveying one day down Mirror Lake way, when some sweet lass naively asked "what you playing?"—no comment. **Jim Brown**, I. E. veteran, is an F. B. I. man now. He trails girls from the "Sunset" to High Street.

This column would like to be serious long enough to congratulate **Dwight Hughes** I. E. 41, on his fine cheer-leading job this year. **John "Cutie" Meyers** made a

hit with the girl at the photography studio. She claims that **John** is the cutest boy she ever saw. **J. Ted McQuaide** still takes those week-end love rides to Canton. Just six more months, Ted, keep it up. Ask editor **Don Postlewaite** about that married woman he met on the train coming back from Arkansas. Incidentally, **Postlewaite's** laryngitis is due to too much "cough syrup".

Why did **John Newman** throw over his smooth Tri Delt date in Lexington for a Cleveland girl. **Charles Stevenson** and "Big" **Bill Feeman** run a terrific race to see who falls asleep first in all Metallurgy classes. Attention all wolves—"Big" **Bill** has about 70 names of girls acquired from the Roller Derbys. Why not ask **Roland Lynch** and **Dean Engle** about the Cornell game? Very revealing.

Recently an engineer told a graduate arts student the following joke:

Engineer: Did you hear about the pilot that took two girls up for an airplane ride; and when the motor failed, he bailed out?

Arts Student: What happened to the girls?

Engineer: They were bags, and they floated down.

Arts Student, very seriously: But what I want to know is: were the girls hurt?

**Prof. "Long John" Carruthers**, Ceramic Dept. asked his design class to define a "board-foot". Silence ensued until "Stinky" **Linkhorn** piped up. It's somebody's foot which has fallen asleep."

**Economics Prof. Sapir** asked his class for a definition of a straight line.

Class: Shortest distance between two points.

Prof: What is the definition of a curve?

Class: Silence.

Prof: The most beautiful distance between two points.
