THE DAVIS WELDING LIBRARY

The Davis Welding Library will soon take its place among the specialized branch libraries around the campus. Mr. A. F. Davis, vice president of the Lincoln Electric Co., has contributed money, the interest of which will be used in purchasing the books for the library. Plans are under way to get started this summer. Quite a few books have already been donated, among them a large set of volumes of the American Welding Society Proceedings. These volumes were donated by Mr. G. O. Carter. Over four hundred of the best papers from the Lincoln Electric Company's \$200,000 contests, will be placed in the library, along with books relating to mechanics, photo-elasticity, and others.
