

Agronomy Pole Barn

This is a prefabricated metal building 20 feet wide and 90 feet long erected by one Jeff Lanon for the Department of Agronomy some 3 or 4 years ago. The building is made from two kits purchased from Sutherland Lumber Co. Most of the building is open on the east side; a portion at the south end is fully enclosed.

The building is used to house farm machinery.

This building is located at 2623 Kenny Road. See map below.

For identification of other buildings shown, see Appendix A.

This building is shown in Photograph X 30235 in Photo Archives.
