

Implement Shelter in Pavey Barn Area

Herrick Archives Building S 36

This is a 20' x 25' roofed area with no sides and attached to the south side of Building 164. See sketch.

For identification of other buildings shown, see Appendix A.

The reason for recording this shelter is that it appears erroneously in some maps as part of Building 164, making the latter an L-shaped building.

No effort has been made to trace the history of this shelter. It appears in photograph X 7934 (dated 1963) in Photoarchives and still stands today.
