

**Your Guidebook
To A Different
Kind Of Campus**

OSU WOOSTER

**Where Study
Puts You
On The Job**

6. What graduates say

They spent two years here— learning the jobs they now have—experiencing campus life—earning their OSU Associate Degrees. Their opinions count. And, you'll learn that more than 94% would recommend OSU-Wooster to a friend.

3. Adventure on the job

Hear the internship adventures of OSU-Wooster students learning on the job: earning class credit assisting trainers at top racetracks around the country; learning from London's royal florist; collecting pay checks from exclusive country clubs; living and farming in Swiss mountain valleys. But adventure isn't required. Plan your choice—close to home or in distant lands.

DETOUR

4. Technical and Management Careers

Meet for an informal discussion with the professor who will guide you in your studies. Ask your questions. Get all the details. They're here to help you. But first, detour to the back of this guide for more information on your technical and management job options.

7. Your future friends

It's a small, friendly campus at OSU-Wooster... talk to some of the students. You'll find they come from all over the Midwest—from the city, the suburbs and the country. And, they're into a variety of activities from sports to drama to music.

8. Extra help when you need it

Find out how orientation will help you get started right. For personal attention, compare OSU-Wooster's eleven to one student-faculty ratio. Consider how peer tutors, special classes, self-learning programs and residence hall living-learning can help you succeed.

1. Like having the job you really want

A research lab, a sawmill, a mechanics and engineering lab, a racetrack, a nursery, a floral shop, a 1200 acre farm—that's just a sampling of typical "classrooms" you'll visit on tour. At OSU-Wooster a big part of learning the job you want is actually doing it on campus.

2. Excitement after class

Discover the exciting range of activities—from elegant dining and dancing to the down and dirty fun of a mud tug, from great first-run movies to feasts of roast pig. Check out Student Senate and the many student clubs.

Plan Your Visit... Your Future

OSU-Wooster—see, explore, discover and decide for yourself. Spend a few interesting hours on campus. Of course, parents are welcome, too. We're ready to schedule your visit. And, Wooster is located only about 30 minutes off I-77 and I-71. Call us today—toll free—at 1-800-647-8283. Or mail the postage-paid card and we'll give you a call.

12. Getting the job you want

Discover why most OSU-Wooster students do get the job they really want after graduation. Then, hear about the 25% of graduates who go into business for themselves.

5. Athletic Challenges

Check the busy schedule of tournaments in six intramural sports. See the new Activities Center—racquetball courts, exercise room and gym.

11. Financial aid

Talk with the friendly Student Services staff. They're ready to help you understand and apply for many forms of financial aid. Ask about the majority of students who received aid last year—more than one million dollars worth!

9. Hut one... hut two—GO BUCKS!

OSU-Wooster students are Buckeyes, too! Check the deadline for ticket requests. Plan a tailgate party and head for Columbus.

10. An apartment with a friend

See the OSU-Wooster Residence Hall where living is like sharing an apartment with a friend. Each two-person apartment includes a private bath...and even a full kitchen unit where you can let your gourmet impulses run wild.

OSU-Wooster

Agricultural Technical Institute

Take a brief tour of OSU-Wooster in these pictures. Then, schedule a visit and explore it for yourself. It won't be like any other campus visit, because it truly is a different kind of place.

You'll meet students who feel like they have the job they really want—right from the start. See ivy growing, not on 100

year old buildings, but in greenhouses under student management. Meet professors with Ph.D's who have given up ties and coats for

lab jackets, coveralls or welding helmets. Discover typical "classroom" activities that include staging a

flower and bridal show, studying water flowing down a flume, planning a supermarket advertising

campaign, caring for a newborn foal, framing up a building or harvesting a field of golden corn.

campaign, caring for a newborn foal, framing up a building or harvesting a field of golden corn.

Technical And Management Choices For An Exciting Future

Landscaping

Plan beautiful landscape designs. Then create them on location. A chance to work outdoors in landscape contracting and construction. Many graduates have started their own businesses.

Mechanics And Engineering

Set your sites on jobs in construction, installation and maintenance of materials systems or repair of construction and field equipment. Learn welding, electrical wiring, hydraulics, air conditioning, diesel and gasoline mechanics, and wood, concrete block and metal building construction.

Horse Training And Breeding

If you've always loved horses, plan a life working with them. Choose breeding, race horse training, or saddle horse. Start each class day at the horse barns, the track or on the farm—with the animals you love.

Laboratory Science

Become a lab technician, the individual that scientists rely on for day-to-day analysis and experimentation. Work for a rubber, chemical or agricultural company—in the lab or in the field.

Food Marketing

Plan a supermarket or restaurant management career—on the retail or wholesale side. Learn food handling/storage/preparation, merchandising, advertising and other management functions.

Greenhouse

Plan to be a grower or greenhouse manager. Choose a career growing and marketing lush green house plants, beautiful flowers and hearty bedding plants.

Conservation

Your chance to do something good for America. Work outdoors for government agencies or drainage contractors fighting soil erosion and water pollution.

Forest Products

Join the many industries manufacturing and marketing primary and secondary wood products. From the sawmill to finished furniture, learn the right techniques.

Beekeeping

If you're an outdoorsman with your eye on a different life style raising the most natural food, consider this unique course of study. Or, choose a career in beekeeping equipment and supply sales and management.

Floral Design

Sharpen your artistic talents by actually designing with flowers while learning basic horticulture and business management, too. Work toward becoming a designer or floral shop manager.

Golf Course And Lawncare

Aim at the good life as a golf course superintendent. Or, join the growing lawncare industry. Put your turfgrass skills to work on the campus putting green.

Nursery And Garden Center

What's your goal: raising trees and shrubs in the nursery, helping customers at the garden center or maintaining an arboretum? Here's the horticultural and business background and the practical experience you'll need.

Agronomic Businesses

Plan to join one of the many industries supporting and supplying the American farmer. This program provides the broad background in agriculture and the concentrated study in business management you'll need.

Specialized Farm Production And Management Programs

If farming is your interest, choose from these 4 specialized programs. Each is excellent training for life on the family farm, or in a farm management or agricultural service job.

Crop Production

Learn efficient, modern, scientific, crop production—in class and on OSU-Wooster's 1200 acre farm. And, get a background in sound business management, too.

Dairy Cattle Production

Prepare for success in dairy farming. Study applied genetics, reproduction, nutrition, health and herd management. Then put your knowledge to work at the OSU-Wooster Dairy Operation.

Beef And Sheep Production

Specialize in Beef or Sheep Production. Get the technical background you need. And, build on that knowledge with practical experience helping manage the OSU-Wooster livestock operations.

Swine Production

Get ready to manage a successful swine operation. Through classes and first-hand experience, learn the best production and management methods from farrowing house to finishing floor.
