The Common Core State Standards (CCSS) initiative is just one way the educational community is ensuring that students across the country have the 21st century skills they need to be successful today, tomorrow, and in the future.

**MCGRAWHILL MY MATH**

The only K-5 program written after the Common Core State Standards were released, and built upon the CCSS Framework

- Built with focus and coherence by CCSS Domains utilizing the proven Understanding by Design instructional approach that gets results
- Daily instruction utilizes a balanced approach of concepts, skills, problem-solving, writing, math, and talking math with multiple higher-order thinking opportunities
- Teaches explicit mathematical practices essential for college and career readiness

**GLENCOE MATH**

A brand new day is dawning for middle school math teachers and students. It’s your day, so find your way to get students excited about math class. It’s a day when students are found outside of school watching math videos and playing math games. It’s a day where teachers can find resources, customize presentations, create leveled homework sheets, and prepare a chapter test easily in one convenient online location. It’s a day powered by Glencoe Math.

**GLENCOE HIGH SCHOOL MATH**

Our newest textbooks—Glencoe Algebra 1, Glencoe Geometry, and Glencoe Algebra 2—ensure that educators have the resources and support they need to be successful in integrating the CCSS into their curricula.

The content in these new editions is specifically designed to meet the CCSS and the unique needs of all learners—whether they are at, below, or beyond grade level. The CCSS are documented throughout each lesson so no additional components or resources are needed.

The *Ohio Journal of School Mathematics* is the journal of the Ohio Council of Teachers of Mathematics. It is intended to be a medium for teachers from elementary to college level to present their ideas and beliefs about the teaching and learning of mathematics. Mathematics educators at all levels are encouraged to submit manuscripts for upcoming issues of the Journal.

Although research studies are not emphasized in the *Journal*, practical application of research implications is appropriate.

**GUIDELINES FOR MANUSCRIPTS and ACTIVITIES**

Manuscripts should be double-spaced with one-inch margins, 11 point Times New Roman font, and a maximum of 8 pages. References should be listed at the end of the manuscript in APA style. Please include appropriate information such as author, journal or book title, publisher, date, and pages.

Original figures, tables, and graphs should appear embedded in the document – both in the electronic and hard copy forms. Please do not use text boxes, footnotes, or head-notes.

One hard copy and an electronic copy are required. The electronic copy may be in Word. The electronic copy should be submitted via an email attachment to elaughba@math.ohio-state.edu. Author name, work address, telephone number, fax, and email address must appear on the cover sheet. No author identification should appear on manuscripts after the cover sheet. (The editors of the *Ohio Journal of School Mathematics* use a blind review process for manuscripts. Classroom activities are not peer-reviewed but undergo a rigorous revision process in consultation with the editors).

Submit manuscripts to *Ohio Journal of School Mathematics*, Journal Editors.

The article content of the *Ohio Journal of School Mathematics* does not necessarily represent the views of the Ohio Council, and all opinions expressed therein are those of the authors.

About the Cover:

Ohio Journal of School Mathematics

Fall 2012 Number 66

1  Taxicab Travel: Mathematically Touring Baltimore
   Nick Fout, Jennifer Marker, Lauren Lotz, and Sarah Porter

9  Curve fitting with the Bubble Board
   Alexandria N. Hammons, Alfinio Flores, John A. Pelesko, and L. Charles Biehl

17 Toward an Understanding of Mathematical Procedures
   Ted Hodgson, Sara Eisenhardt, and Jennifer Mugavin-Smith

25 Using Literacy Strategies for High-Stakes Assessment Preparation
   Linda Marie Saliga and Lynne M. Pachnowski

30 Mathematical Morsels: A Monthly Voyage of Problem-Solving Goodness
   Chris Bolognese and Todd Edwards

31 Math Circles Inscribed in Ohio
   Chris Locke, Jeff Oyster, Kristin MacDonald, Jenya Soprunova, and Joanne Caniglia

35 Always Improving: Turning Test Responses into Learning Opportunities
   John S. Parke

39 An Interesting Application of the Difference of Two Squares
   Denise Taunton Reid and Sudhir K. Goel

44 The 2012 State Tournament of Mathematics Results
   Michael Flick and Debbie Kuchey
