In this issue
- Graphing Artwork
- The Mathematics of Origami
- Geometry Scavenger Hunts with iPads
- Professional Development and the Common Core
- Much, much more!
The Ohio Journal of School Mathematics is the journal of the Ohio Council of Teachers of Mathematics. It is intended to be a medium for teachers from elementary to college level to present their ideas and beliefs about the teaching and learning of mathematics. Mathematics educators at all levels are encouraged to submit manuscripts for upcoming issues of the Journal.

Although research studies are not emphasized in the Journal, practical application of research implications is appropriate.

GUIDELINES FOR MANUSCRIPTS and ACTIVITIES

Manuscripts should be double-spaced with one-inch margins, 11 point Times New Roman font, and a maximum of 8 pages. References should be listed at the end of the manuscript in APA style. Please include appropriate information such as author, journal or book title, publisher, date, and pages.

Original figures, tables, and graphs should appear embedded in the document – both in the electronic and hard copy forms. Please do not use text boxes, footnotes, or head-notes.

One hard copy and an electronic copy are required. The electronic copy may be in Word. The electronic copy should be submitted via an email attachment to elauthorba@math.ohio-state.edu. Author name, work address, telephone number, fax, and email address must appear on the cover sheet. No author identification should appear on manuscripts after the cover sheet. (The editors of the Ohio Journal of School Mathematics use a blind review process for manuscripts. Classroom activities are not peer-reviewed but undergo a rigorous revision process in consultation with the editors).

Permission to copy is granted to teachers for instructional use when the material is to be distributed free of charge or at cost only, to librarians who wish to place a limited number of copies on reserve, and to other professional journals. In all such instances, due credit must be given to the author(s) and to the Ohio Journal of School Mathematics. A copy of the document using Journal materials must be sent to the OCTM editor. Commercial use is prohibited. Copyright © 2013, the Ohio Council of Teachers of Mathematics.
63rd Annual OCTM Conference

Dr. Jo Boaler is a Professor of Mathematics Education at Stanford University and the editor of the Research Commentary Section of The Journal for Research in Mathematics Education (JRME). She is a former Marie Curie Professor of Mathematics Education at the University of Sussex, England, mathematics teacher in London comprehensive schools, and lecturer and researcher at King's College, London. Dr. Boaler is the author of seven books and numerous research articles on classroom interactions, equity, mathematical identity, and effective teaching.

Dr. Randall Charles is Professor Emeritus in the Department of Mathematics at San Jose State University, San Jose, California. His primary research has focused on problem solving, with publications such as Teaching Problem Solving: What, Why, and How (Dale Seymour), Teaching and Assessing Problem Solving (NCTM), How to Evaluate Progress in Problem Solving (NCTM), and Teaching Mathematics through Problem Solving. Dr. Charles has served as a K–12 mathematics supervisor, Vice President of the National Council of Supervisors of Mathematics, and member of the NCTM Research Advisory Committee. Sponsored by Pearson Education.

Ohio Council of Teachers of Mathematics
2013 Conference
October 17-18
Dayton, Ohio

Dr. Glenda Lappan is a University Distinguished Professor in the Program in Mathematics Education at Michigan State University. Her research and development interests are in the connected areas of students' learning of mathematics and mathematics teachers' professional growth and change at the middle and secondary levels. Among her many distinguished roles in mathematics education, she has served as a co-author of the Connected Mathematics Project. Sponsored by Pearson Education.

Eric Milou is Professor in the Department of Mathematics at Rowan University in Glassboro, NJ. Eric teaches pre-service teachers and works with in-service teachers, and is primarily interested in balancing concept development skill proficiency. Eric is the author of Teaching Mathematics to Middle School Students, published by Allyn and Bacon. Sponsored by Pearson Education.
