Ohio Journal of School Mathematics

Number 64
Fall 2011

Building an Energetic Community of Ohio Mathematics Educators

A publication of the Ohio Council of Teachers of Mathematics
www.ohioctm.org
The *Ohio Journal of School Mathematics* is the journal of the Ohio Council of Teachers of Mathematics. It is intended to be a medium for teachers from elementary to college level to present their ideas and beliefs about the teaching and learning of mathematics. Mathematics educators at all levels are encouraged to submit manuscripts for upcoming issues of the Journal.

Although research studies are not emphasized in the *Journal*, practical application of research implications is appropriate.

**GUIDELINES FOR MANUSCRIPTS and ACTIVITIES**

Manuscripts should be double-spaced with one-inch margins, 11 point Times New Roman font, and a maximum of 8 pages. References should be listed at the end of the manuscript in APA style. Please include appropriate information such as author, journal or book title, publisher, date, and pages.

Original figures, tables, and graphs should appear embedded in the document – both in the electronic and hard copy forms. Please do not use text boxes, footnotes, or head-notes.

One hard copy and an electronic copy are required. The electronic copy may be in Word. The electronic copy should be submitted via an email attachment to elaughba@math.ohio-state.edu. Author name, work address, telephone number, fax, and email address must appear on the cover sheet. No author identification should appear on manuscripts after the cover sheet. (The editors of the *Ohio Journal of School Mathematics* use a blind review process for manuscripts. Classroom activities are not peer-reviewed but undergo a rigorous revision process in consultation with the editors).

Submit manuscripts to *Ohio Journal of School Mathematics*, Journal Editors.

**About the Cover:**
Image of cycloid graph, courtesy of Ali Chidester, a student at Upper Arlington Community High School. Snowflake design generated by Make-a-Flake by Barkley (http://snowflakes.barkleyus.com), courtesy of Dylan Michael Edwards. The “Tree of Mathematics” is used courtesy of Cassady Rhyan Edwards. Individuals interested in contributing cover art for future issues of the *Journal* are encouraged to submit graphics (.png or .tiff formats are preferrable) to Michael Todd Edwards at m.todd.edwards@muohio.edu.
A copy of the document using Journal materials must be sent to the OCTM editor. Commercial use is prohibited. Copyright © 2011, the Ohio Council of Teachers of Mathematics.
Success Your Way with MATH

Your exciting new middle school math program built around the Common Core State Standards

A brand new day is dawning for middle school math teachers and students. It’s your day so find your way to get students excited about math class. It’s a day when students are found outside of school watching math videos and playing math games. It’s a day where teachers can find resources, customize presentations, create leveled homework sheets, and prepare a chapter test easily in one convenient online location. It’s a day powered by Glencoe Math.

Glencoe Math is a unique, new middle school program that presents math in real and relevant ways to students and provides a robust toolkit to teachers. It’s just what you’ve been looking for to engage students and energize teachers.

Uniquely Interactive
- iPad™ compatible lessons, games, apps, videos, and virtual manipulatives connect with today’s digital natives.
- Students work problems, tear out pages, take notes, and complete homework sheets right in the book.

Highly Customizable
- ALL planning and assessment resources are in one online portal.
- Exclusive access to ConnectED offers customizable resources, such as lesson presentations and editable worksheets.

Built to the new Common Core State Standards
- Lessons, assessments, and activities ease student and teacher transition to the new standards.
- Point-of-use common core curriculum simplifies planning.

Teach Your way... in Their world

With Glencoe Math, you engage students by teaching math in real, relevant ways. And robust resources let you incorporate the latest
