Foreword

The Computer and Information Science Research Center of The Ohio State University is an inter-disciplinary research organization which consists of the staff, graduate students, and faculty of many University departments and laboratories. This report presents research accomplished in cooperation with the Department of Linguistics.

The work of the Center is largely supported by government contracts and grants. The preparation of one of the papers contained in this report was partly supported by the Office of Science Information Service, National Science Foundation under Grant No. GN-534.1.

Bondarko, et al.", Ilse Lehiste, pp. 88-132.

Introduction

The two papers contained in this issue of Working Papers in Linguistics deal with syntax. The contribution by Gregory Lee was partly supported by the National Science Foundation under Grant No. GH-534. The paper by Alexander Grosu is published with support from the Graduate School of The Ohio State University. Both treat aspects of the notion of subject. Lee's contribution (also submitted as a Ph.D. dissertation, December 1970) argues that, in English at least, deep subjects are identical with Agents, as treated by Fillmore. Grosu (whose work constitutes his M.A. thesis, December 1970) considers the conditions under which subjects of complement sentences are deletable under identity with noun phrases in higher structures. Please note that the two papers are paginated separately.
