ENROLL A NEW MEMBER

The Ohio Academy of Science was organized on December 31, 1891, at Columbus, was incorporated on March 12, 1892, and became affiliated with the American Association for the Advancement of Science early in 1920. Its membership has grown from 59 charter members to more than 1200. The membership is representative of the educational and scientific institutions of the State and includes quite a number of persons outside the State.

AIMS—According to the Constitution: "The objects of this Academy shall be the promotion of scientific research and the diffusion of knowledge concerning the various departments of science." In addition to research and publication, the Academy aids in securing legislation which is favorable to scientific projects, as conservation, topographic and geologic survey, and in other important scientific projects.

MEMBERSHIP—Membership is open to all persons interested in science. Members engaged in scientific work may be elected "fellows." Each member receives The Ohio Journal of Science and the publications of The Ohio Biological Survey for the regular annual dues of $3.00. Institution and corporation memberships are also open to such organizations in the state.

SECTIONS—Each member is enrolled in one section for voting purposes, but is privileged to participate in the program of any section. To avoid excessive subdivision into sections as new fields of research develop, symposia which may cut across several fields of interest are scheduled at the annual meeting at hours which permit attendance of persons from various sections. Sections are listed below:

A—Zoology  E—Psychology  I—Mathematics  
B—Botany  F—Physics & Astronomy  J—Science Education  
C—Geology  G—Geography  K—Anthropology & Sociology  
D—Medical Sciences  H—Chemistry  L—Conservation  

MEETINGS—Annual meetings are held at a time and place fixed by the Executive Committee and the Council on the basis of invitations extended by educational institutions presented at the previous annual meeting. A regional plan is followed, so all areas of the state are covered over a period of several years. In addition to the program of scientific addresses and papers, field trips are frequently arranged.

OFFICIAL ORGAN—From 1892 to 1903, the Journal of the Cincinnati Society of Natural History and the technical series of Bulletins of the Ohio Experiment Station were the official organs of the Academy; in 1903 the Ohio Naturalist was made the official organ and continued as such until 1915 when the Ohio Journal of Science became the official organ. Its columns are open to members of the Academy for special contributions, subject to acceptance by the Editorial Board. Articles in all scientific areas appear in the Journal.

RESEARCH FUND—From 1898 to 1922, through the generosity of M. Emerson MacMillan, of New York, a fund was available annually for encouragement of research among the Academy members. An accumulation from this grant together with the annual grant from the A.A.A.S. makes grants for research available to Academy members. This fund is administered by a committee known as the Trustees of the Research Fund.

INFORMATION—Requests for information concerning any part of the Academy program should be addressed to the Secretary, who will either send a reply or will forward the request to the proper person for reply. The current Secretary is:

DR. RUSH ELLIOTT, Ohio University, Athens, Ohio.

THE OHIO ACADEMY OF SCIENCE  
(Affiliated with the A.A.A.S.)  

I desire to become a Member of the Ohio Academy of Science. It is understood that my membership will begin immediately. Dues are attached* according to one of the following plans:

1. Application dated before July 1, $3.00 dues for current year, Jan. 1 to Dec. 31, with all copies of The Ohio Journal of Science for the year.

2. Application dated after July 1, check one option:
   - $3.00 dues for current year, Jan. 1 to Dec. 31, with all copies of The Ohio Journal of Science for the year; or
   - $1.50 dues for last half of current year, July 1 to Dec. 31, with copies of The Ohio Journal of Science for last six months only.

3. Corporation and Institution Memberships—$25.00 dues for the current year with copies of The Ohio Journal of Science for the year.

Dr.  Mr.  
Name Miss Mrs.  
Corp. Inst.  

Address  
(Check title preferred. Please print name)  
(Print preferred mailing address)  

City  

Institution Affiliation  

I wish to enroll and vote in Section______ (one section only—see above).

*Make check payable to The Ohio Academy of Science, and mail to Dr. R. M. Geist, Treasurer, Capital University, Columbus 9, Ohio.

OUR 95th YEAR

WHEN you compare the cost of printing, do you
compare the cheap to the cheap, the good to the good,
the finest to the finest?
If not, you are falling into an error all too common in
a day when even the "hard-headed businessman" seems
to have forgotten that you get what you pay for.
Quality for quality, from the cheapest to the finest,
your Printing Dollar can buy no greater value than
Monotype Printed by Letterpress.

A NEW GENERAL PHYSICS
Especially Suitable for Students Considering Courses in Biology, Medicine, Dentistry, Laboratory Technology and also Agriculture

GENERAL COLLEGE PHYSICS
By ERTLE LESLIE HARRINGTON, Ph.D., F.R.S.C.
Professor and Head, Department of Physics
University of Saskatchewan
Consulting Physicist, Saskatchewan Cancer Commission

FOR THE PRE-BIOLOGY OR PRE-MEDICAL STUDENT this text will aid greatly in bridging the gap between the basic science of physics and the biological and medical sciences. THE GENERAL STUDENT IN ARTS AND SCIENCE will find this work not only presents the basic principles expected of a course in general physics, but has illustrative material intrinsically more interesting and more closely related with his living and his environment than that generally found in other physics texts.

787 pp. — 6 x 9 — Illustrated — Cloth — $6.75

A New Text on PHYSICS Which Features An Unusual MODERN Approach

ELEMENTS OF MODERN PHYSICS
By WALTER C. MICHELS, Bryn Mawr College, and A. L. PATTERSON, Institute for Cancer Research and Lankenau Hospital Research Institute, Philadelphia.

MKS Units are used throughout to give a simplicity of treatment not possible with other systems.
Special relativity and wave-particle quality are successfully treated at the introductory level.
The basic ideas of atomic and nuclear structure are shown to be consequences of general physical reasoning.
A large number of exercises are included most of which are designed to require physical thinking on the part of the students rather than substitution in formulae.

659 pp. — 6 x 9 — Illustrated — Cloth — $6.50
