MENTION THE Ohio JOURNAL of Science

Now Ready . . .

A History of Entomology
By HERBERT OSBORN

A brief History of Entomology from ancient times down to the present day. Dr. Osborn, dean of entomologists, puts in type a most interesting story of entomology through all its various divisions. 255 photographs with sketches of many of the prominent entomologists of all time.

A book for the amateur, the teacher, the student.

$4.50 postpaid

PREPARATION OF MANUSCRIPTS FOR PUBLICATION IN THE OHIO JOURNAL OF SCIENCE

The following suggestions are presented in order to minimize revisions and editorial corrections. Uniformity of style and format necessitates attention to detail by authors even though many points may seem arbitrary. The cooperation of authors in the preparation of manuscripts will permit the publication of greater numbers of papers within the limited funds available.

STYLE. Recent issues of the Journal should be examined so that authors become familiar with its general style. Manuscripts should be neatly typewritten on 8½ X 11 inch paper with wide margins and double-spacing throughout, including title, footnotes, quotations, tables, literature cited, headings, and legends. Pages should be numbered consecutively. Excessive quotations in the text should be typed with slightly wider margins. Words and numerals to appear in italics should be underlined in the typed copy.

Make the size and proportions of each group of illustrations suitable for reduction to the width of the printed page (4½") and any portion of the length (7½"). Line drawings for reproductions are often made too large. As a general rule the dimensions should be no greater than 9 X 15 inches. If carefully drawn they need be no more than 50 percent larger than the size desired when in print. Original drawings should be submitted for making engravings. In addition to the original illustrations, a photographic copy of each (no larger than 8½ X 11 inches) should accompany the manuscript to facilitate transmisal of the manuscript to the reviewers.

Leave a 3-inch margin at the top of the first page above the title. Title is to be typed in capital letters. Scientific names of organisms in the title should be underlined. The author's name should be typed in capital letters below the title. The address of the department, institution, city and state which are to be credited with supporting the author and his work should be typed (caps and lower case) below the author's name and underlined. If more than one institution is to be credited, their names should appear in the order corresponding with the authors' names.

Main headings are to be typed in capital letters, centered and not followed by a period; sub-headings are to be typed in lower case with the initial letter of main words capitalized and each word in the heading underlined. Sub-headings may be centered or located at the beginning of a paragraph. When a sub-heading appears at the beginning of a paragraph, it is followed by a period and may be numbered. Text should begin below the author's address. Do not use a separate title page.

FOOTNOTES. Text footnotes should be avoided if at all possible. Reference to the literature is not permitted as a footnote but must be placed in the section on References or Literature Cited. Acknowledgments are incorporated in the regular text at the end of the summary, just before the literature cited.

Two kinds of text footnotes are permissible. A footnote on the title of the article may be used for a statement such as "Department publication 522," or "Part of a dissertation submitted in partial fulfillment . . . ." A footnote on the author's name may be used for a statement such as "Present address . . . ." or "Pellow of the . . . ."

REFERENCES or LITERATURE CITED. References to scientific literature should be accumulated in a list, arranged alphabetically by author's last name, and typed, double-spaced, on a separate sheet of paper at the end of the text. The page should be entitled REFERENCES or LITERATURE CITED, typed in caps and centered. Examine recent issues of the Journal for the detailed form. References are referred to in the text as Paterson (1940) or (Paterson, 1940).
