The following suggestions are presented in order to minimize revisions and editorial corrections. Uniformity of style and format necessitates attention to detail by authors.

**STYLE.** Recent issues of the *Journal* should be examined so that authors become familiar with its general style. Manuscripts should be typewritten on 8½ × 11 in. paper with wide margins and double-spacing throughout. Pages should be numbered consecutively. Extensive quotations in the text should be typed with single-spaced lines and underscoring; most quotations should be made to appear in italics. We should be underlined in the typed copy. Acceptable symbols should be used for units of measurement; e.g., see *Style Manual For Biological Journals*, compiled by the Conference of Biological Editors of the American Institute of Biological Sciences, 2000 P Street, N. W., Washington, D. C. 20006.

**ABSTRACTS.** The abstract should be a concise summary of the significant facts contained in the paper. It should be sufficient within itself, presenting the main conclusions of the paper, any new compound, species, or mineral, etc. described, and any new methods of procedures critical to the results presented in the paper. It should be brief and preferably shorter, but complete sentences should be used to promote comprehension and clarity and to avoid ambiguity. Words such as "are presented" or "is explained" should be avoided.

**LITERATURE CITED.** References to scientific literature should be accumulated in a list, arranged alphabetically by author's last name, and typed, double-spaced, on a separate sheet of paper at the end of the text. They should not be numbered. The page should be entitled REFERENCES or LITERATURE CITED, typed in caps and centered. Examine recent issues of the *Journal* for the detailed form. References are referred to in the text as "Patterson (1940)" or "(Patterson, 1940)." In case of more than two authors, " et al." may be used in the text, but all coauthors must be listed in the reference section. Total number of pages should be given for books.

**FOOTNOTES.** Footnotes to tables are permissible as described above. Reference to the literature is not permitted as footnotes, but must be handled as described below. Acknowledgments are incorporated in the regular text at the end of the summary, just before Literature Cited.

**REFERENCES OR LITERATURE CITED.** References to scientific literature should be accumulated in a list, arranged alphabetically by author's last name, and typed, double-spaced, on a separate sheet of paper at the end of the text. They should not be numbered. The page should be entitled REFERENCES or LITERATURE CITED, typed in caps and centered. Examine recent issues of the *Journal* for the detailed form. References are referred to in the text as "Patterson (1940)" or "(Patterson, 1940)." In case of more than two authors, " et al." may be used in the text, but all coauthors must be listed in the reference section. Total number of pages should be given for books.

**ABSTRACTS.** The abstract should be a concise summary of the significant facts contained in the paper. It should be sufficient within itself, presenting the main conclusions of the paper, any new compound, species, or mineral, etc. described, and any new methods of procedures critical to the results presented in the paper. It should be brief and preferably shorter, but complete sentences should be used to promote comprehension and clarity and to avoid ambiguity. Words such as "are presented" or "is explained" should be avoided. Abstracts are not to contain illustrations, tables, references, or footnotes.
