

The OHIO ACADEMY of SCIENCE

DIGITAL PRODUCTS AND SERVICES

- Ohio's Natural Heritage book & CD-ROMs
- *The Ohio Journal of Science* DIGITAL ARCHIVES
- Heartland Science Website

AVAILABLE AGAIN!
OUT OF PRINT FOR MORE THAN 20 YEARS

Specifications

- 336 pages
- 9"x12" digitally-printed, B&W text and illustrations, full color cover, paper-bound book
- 463 illustrations—163 in full color (CD-ROM editions)
- Special color maps
- 28 authors—Ohio's leading scientists and naturalists
- Cover art by CHARLES HARPER—well know Cincinnati wildlife artist
- Index and additional readings
- Links to contemporary websites on CD-ROM editions
- Fully, key word searchable CD-ROM

Contents

Preface • Contents • Introduction • **Part I-THE LAND** 1. The Ohio Country • 2. Written in the Rocks • 3. Ice Over Ohio • 4. Today's Landscape • 5. Climate and Weather • 6. Cradle of Life • 7. Ohio Forests • 8. Ohio Waters • 9. Relics of the Past, Prairies, Bogs and Caves • **Part II-NATURAL REGIONS** • 10. The Hill Country • 11. The Glaciated Plateau • 12. The Till Plains • 13. Lake Erie and the Islands • 14. The Lake Plain • 15. The Bluegrass • **Part III-THE IMPACT OF MAN** • 16. The First Ohioans • 17. Changing Land Use • 18. The Naturalists • 19. Preserving the Heritage • Additional Readings • About the Authors • Illustration Credits • Index

Ohio's Natural Heritage

Digitally-printed B&W text book and full color CD-ROM

MICHAEL B. LAFFERTY
Editor-in-Chief

HERE, again, is a long-awaited book. First published in 1979 in hardcover and out-of-print since the early 1980s, it is presented here for the digital age in full-color Adobe Acrobat® format on a CD-ROM. Twenty eight specialists invite the reader to survey in a single volume the whole of Ohio's natural environment. The geologic forces that shaped the state, the colorful plant and animal life of its forests, prairies, hills, lakes and streams, the first people in what is now Ohio—these are only a few of the features that are described.

In each chapter maps, drawings and photographs, many of them in color, supplement a readable and nontechnical text. The result is a storehouse of solid information and an excellent reference book while its popular style and striking format make it an exquisite gift for anyone. For young students, it is a gateway to anthropology, geology, climatology, and the whole study of living things. For adults, it opens new worlds of interest. *Ohio's Natural Heritage*, particularly because of its wide range, the quality of its authorship, and the uniqueness of its approach, continues to meet a long-standing need.

Ohio's place in history has been achieved by the use of our rich natural endowment. Our forests, soils, minerals and energy resources, streams, climate, plants and animals have been the foundation upon which our great agricultural and industrial state has developed. This book commemorates and interprets our great natural heritage for all to appreciate and understand. Published in cooperation with The Ohio Department of Natural Resources, Division of Wildlife and Division of Natural Areas and Preserves.

Opening navigation screen of CD-ROM

SPECIAL CD-ROM edition for educators was funded in part by a grant to The Ohio Academy of Science from The Ohio Environmental Education Fund. This fully-searchable CD-ROM features links to Ohio's *Science* and *Social Studies* Academic Content Standards with inquiry-based lesson plans for each chapter.

The Ohio Journal of Science

Author's Instructions for Preparation of Manuscripts

The Ohio Journal of Science considers for publication solicited **Book Reviews** and **Research Reviews**, and unsolicited **Brief Notes** and **Research Reports**. Solicited submissions will be requested by the editor or member of the editorial board. Book reviews will be requested of experts in the subject matter of the book to be reviewed. Research Reviews will be requested to serve as extensive surveys of the literature of an area of science in which Academy members have an interest.

Unsolicited submissions, in the form of presentations of quantitative or qualitative data pertinent to any of the divisions of the Academy listed inside the front cover, will be considered for peer review. Brief notes are manuscripts that are less than 2 printed pages (approximately 6 typed pages) and contain no more than one table, figure or other type of illustration. The editor will identify papers which meet these criteria as Brief Notes if not already categorized as such by the author. Research Reports are those papers which are longer than 2 pages or contain more than one illustration.

All manuscripts will be organized as follows:

Page 1 – Title, Author(s), Running Head, Abstract

Page 2 and remainder – Introduction, Materials and Methods, Results, Discussion, Acknowledgments, Literature Cited, Tables, Figure Legends, Figures.

STYLE. *The CBE Manual for Authors, Editors, and Publishers*, 7th Ed. is used for editorial decisions with regard to style. Manuscripts should be typewritten using 1 inch margins on 8.5 x 11 inch paper. Text should be left-justified using elite print (twelve characters per inch). Three copies should be submitted. Manuscript should be double spaced throughout, including the title and abstract. Arabic numerals should be used in preference to words when the number designates anything that can be counted or measured (7 samples, 43 species). One exception to this use is that numerals are not used to begin a sentence (Twenty-one species were found in ...). The 2nd exception is when 2 numeric expressions are adjacent in a sentence. The number easiest to express in words should be spelled out and the other left in numeric form (The sections were divided into eight 4-acre plots).

TITLE, AUTHOR(S), AFFILIATION(S). The first page of the manuscript should contain the title, author(s) name(s), the affiliation of the author(s) at the time the research was carried out, a shortened title (running head), and the abstract. The title must be typed in upper and lower case letters as it will appear when typeset. Name(s) of the author(s) should be typed in capital letters below the title. The address (department, institution, city, state, postal code, country if not USA) should appear below the name of the author(s). If more than one institution is to be credited, they should appear in the order of the authors' affiliation. A running head of not more than 38 letters and spaces should be typed in capital letters between the address and the abstract.

ABSTRACT. The abstract should summarize the main conclusions and any new methods or procedures critical to the results of the study. It should be 250 words or fewer.

INTRODUCTION. The introduction should describe the knowledge that gave rise to the question examined by, or the hypothesis posed for the research.

MATERIALS AND METHODS. This section should describe the research design, the methods and materials used in the research (subjects, their selection, equipment, laboratory or field procedures), and how the findings were analyzed.

RESULTS. The text of the results should be a descriptive narrative of the main findings, of the reported study. This section should not list tabulated data in text form. Reference to tables and figures included in this section should be made parenthetically in the text.

DISCUSSION. This section should compare and contrast the data collected in the presented study with that previously reported in the literature. Unless there are specific reasons to combine the two, as explained by the author in the letter of transmittal, Results and Discussion should be two separate sections.

ACKNOWLEDGMENTS. Colleagues and/or sources of financial support to whom thanks are due for assistance rendered in completion of the research or preparation of the manuscript should be recognized in this section rather than in the body of the text.

LITERATURE CITED. References to scientific literature should be arranged alphabetically by first author's last name using the Name/Year (N-Y) method as described in the *CBE Manual*.

Journals:

Author(s). Year. Article title. Journal title volume number (issue number):inclusive pages.

Thomison JB. 1988. Uniform requirements for manuscripts. *South Med J* 81(8):947-52.

Form of citation: (Thomison 1988)

Books:

Author(s). Year. Title. Place of publication: publisher name. Number of pages.

Voet D, Voet JG. 1990. *Biochemistry*. New York: J Wiley. 1223 p.

Form of citation: (Voet and Voet 1990)

Multiple author citation: (Steiner and others 1992)

TABLES. Tables must be typed double spaced, one table to a page, numbered consecutively, and placed in the manuscript after Literature Cited. Since tables must be individually typeset, consolidation of data into the smallest number of tables is encouraged. A horizontal double underline should be made beneath the title of the table, and single underlines should be made the width of the table below the column headings and at the bottom of the table. Do not use vertical lines, and do not place horizontal lines in the interior of the table. Footnotes should be used to clarify possible questions within the table, and should be noted by asterisks, daggers, or other symbols to avoid confusion with numerical data.

FIGURES. All illustrations are referred to as "Figures" and must be numbered consecutively. Figures may be photographs, hand-drawn or computer generated drawings in black ink. Each figure should be identified along the top edge with the name of the author(s) and figure number, and on the back with name of author(s) and manuscript title. Illustrations other than those generated by the author(s) must bear permission for use and credit to the originator. ORIGINAL ARTWORK WILL NOT BE RETURNED UNLESS SPECIFICALLY REQUESTED AT TIME OF SUBMISSION. Each figure must have a complete legend. The legend should not be placed on the figure, but should be typed in order, double-spaced, on a separate sheet which precedes the figures in the manuscript. Figures should be referred to parenthetically in the text, for example (Fig. 1). The size and proportion of each illustration should be suitable for reduction. Excessive white space should be avoided. Illustrations will be reduced to one column width (3 and 3/8 inches) or two column width (7 inches) at the discretion of the editor. Lettering should be done of a size to ensure that it can be read after reduction. On maps and other illustrations where original size is a concern, a graphic scale should be incorporated into the figure.

FOOTNOTES. Text footnotes **should not be used** with the following exceptions. A footnote to the title will be added editorially to state the dates of manuscript submission and revision. A footnote to name(s) of author(s) may be used to indicate present address different from that at which the research was done, or to indicate the author to whom inquiries should be directed. All other material or comments must be incorporated into the text. Literature Cited should not be inserted as foot-notes. Footnotes to tables are permissible, and are encouraged to promote clarity.

Attention to the above instructions will minimize the need for revision and editorial correction, and will shorten the time from submission to publication. Any questions which are not answered by these instructions, or by consulting the *CBE Manual for Authors, Editors, and Publishers*, 7th Edition, should be addressed to the editor.

After consulting the manuscript preparation guidelines at <http://www.ohiosci.org/ojsinstr.htm>, please submit all materials to:

Manuscript Processing

About the Annual Meeting

The Ohio Academy of Science's Annual Meeting is for academic, governmental, and industry scientists and engineers, university and pre-college educators, and pre-college, undergraduate, and graduate students, and interested lay citizens in the Ohio region. Annually the several hundred scientific presentations are complemented by workshops, symposia, an All-Academy Lecture, and field trips on local geology and plant sciences.
