- Appears in Collections:** [Ohio State Engineer: Volume 19, no. 1 \(October, 1935\)](#)

# GREETINGS . . . . .

At last that dream which you have had for years has come true; you are now on the campus of The Ohio State University, and enrolled in this College of Engineering.

To enter college is one of the greatest events in a young man's life. To "make the grade" and graduate is a greater event. Here is an opportunity, and your goal should be to make a record better than father or brother, who graduated in the past.

However, constant application to your books is not expected. Enter into the beautiful and wholesome activities of the campus; take if possible an important part. You may not be able to join in the football squad, but you can be in the stadium with a loyal sympathetic attitude which is inspiration to the group before you which is straining every nerve to uphold the traditions of the University. Loyalty in every direction is expected. "Play the game" and support, in so far as you are able, the activities of your College.

This magazine is your College publication and is the only link which ties your College to some twenty-five other engineering schools. The Ohio State Engineer requires your interest and support.

E. A. HITCHCOCK,  
*Dean, College of Engineering.*

It is indeed a pleasure to welcome all of you engineers at the beginning of the new college year. I know of no more appropriate channel through which to convey my greetings than the columns of the Ohio State Engineer. Each one of you, whether numbered with the 472 freshmen, the 80 transfer students, or the 900 upperclassmen, should give hearty support to this very excellent student publication which holds a high place among the campus magazines. Some of you will want to take an active part in the publication of the Engineer. I assure you that the staff will welcome you into the family. To those of you who do not wish to be actively identified with the Engineer, I should like to suggest that you show your interest and loyalty by becoming a subscriber. There will be seven numbers issued during the year, each one containing articles of interest to you. In addition there will be news items from the various departments in the college. Special features for this year will be a puzzle column filled with brain teasers, and articles by John M. Weed, Assistant Director of the Engineering Experiment Station, and Wilson R. Dumble, Department of English. Subscribe for the Engineer today!

WILLIAM D. TURNBULL,  
*Junior Dean, College of Engineering.*
