
Bibliography of Ohio Geology, 1951-1960. *Pauline Smyth*, 1963. Ohio Geological Survey Information Circular No. 32. 63 p. Copies may be obtained from The Ohio Division of Geological Survey, 1207 Grandview Ave., Columbus 12, Ohio. 97 cents plus 3 cents tax in Ohio.

This new bibliography is a supplement to Ohio Geological Survey Bulletin 52 which was a bibliography of articles and publications about Ohio geology through 1950. The number of articles, both technical and popular, which are being written about the rocks of Ohio and their history is increasing every year. Information Circular 32 will help the geologist to find articles that were written in his particular field of interest during the 10-year period covered and it will be an aid to the layman with an interest in geology to find recent literature to tell him more about our State.

The circular consists of a bibliography arranged alphabetically by author, with an index to the subjects and areas covered by the articles in the bibliography. The bibliography contains 1063 citations.
