

NEW AND RARE PLANTS ADDED TO THE OHIO LIST IN 1914.

JOHN H. SCHAFFNER.

The following records of new and rare plants have been made for the year and are to be added to the new "Catalog of Ohio Vascular Plants." Additions are inserted with decimal fractions; records of new distribution with the appropriate numbers from the list as published.

170. *Scirpus planifolius* Muhl. Flat-leaf Club-rush. In woods; Strasburg, Tuscarawas County. V. Sterki.

597. *Tipularia unifolia* (Muhl.) B. S. P. Crane-fly Orchis. Reported from Ashtabula County. R. J. Sim.

701.1. *Lepidium perfoliatum* L. Perfoliate Peppergrass. Naturalized at Kent, Portage County. From Europe. L. S. Hopkins.

1393. *Ledum groenlandicum* Oedr. Labrador Tea. From "May Swamp" in Portage County. L. S. Hopkins.

1760. *Diodia teres* Walt. Rough Buttonwood. East Cleveland, Cuyahoga County. Edo Claassen.

Three species were added while the catalog was going thru the press and therefore have fractional numbers. These are the following:

563.1. *Dioscorea bulbifera* L. Air Potato (Yam).

1053.1. *Sorbus aucuparia* L. European Mountain-ash.

1273.1. *Quercus triloba* Mx. Spanish Oak.

As is usual with linotype printing, a number of errors appear in the catalog. Mistakes can readily be corrected by reference to Britton & Brown's "Illustrated Flora," Second Edition. The first line numbered 1043 should be erased. The following species were lost out bodily in the final forms:

1045. *Rosa setigera* Mx. Prairie Rose. General, but no specimens from the Northeastern Counties.

1520. *Scrophularia marylandica* L. Maryland Figwort. General.

2024. *Cirsium odoratum* (Muhl.) Britt. Fragrant Thistle. Ashtabula County.
