## Introduction

Most of the contributions to this volume are from the area of experimental linguistics. The volume begins with Linda Shockey's doctoral dissertation, submitted in 1973. The paper by Sara Garnes constitutes an expanded version of a paper given at the summer meeting of the Linguistic Society of America in Ann Arbor in August 1973. A condensed version of the first paper by Ilse Lehiste was presented at the 86th meeting of the Acoustical Society of America on October 30, 1973, at Los Angeles. The second paper by Lehiste and the paper by Patricia Miller appear here for the first time. The work of Ilse Lehiste and Linda Shockey was partially supported by the National Science Foundation under Grant GS-31494 #2. Sara Garnes' work was partially supported by NSF grant GS-36252.

The volume also contains two annotated bibliographies by Arnold M. Zwicky and one by Patricia Miller on topics that happen not to be directly connected with experimental linguistics, but continue a feature started in Working Papers 16.
