- Appears in Collections:** [Ohio State Engineer: Volume 20, no. 1 \(November, 1936\)](#)

GREETING

I wish to extend to all the students and faculty members of the College of Engineering most cordial greetings at the beginning of another college year.

This fall we have the largest enrollment in our history and I am sure each one of us, whether student, faculty member, or administrative officer, will enter upon the work of the year with the greatest enthusiasm and determination to make this year of the largest enrollment the best in accomplishment. To do this will require the closest cooperation on the part of all. That this cooperation will be forthcoming I am certain.

This year we will be without the active leadership of our kindly and distinguished Dean Hitchcock who has been the head of the college for the past sixteen years. Our college must carry on the constructive work which he has done throughout the years. We must keep up the standards of the college and not lose the fine things which we have attained under his capable leadership. I am sure I speak for all the students and faculty members, and a host of former students and alumni, when I extend to him most cordial greetings and render grateful thanks to him for what he has done in the sixteen years of his deanship. I salute him as Dean Emeritus, and hope he will be with us as friend and counsellor for many years to come.

WILLIAM D. TURNBULL,
Acting Dean.

Of, by, and for The Engineer

One thing that has made *The Ohio State Engineer* outstanding, I believe, is that its authors have mostly been students writing about their own experiences, letting the world know that they have ideas. That's the way it should be. Let a faculty member or an alumnus ride his hobby now and then, but reserve most of the space for exhibiting the steeds that will win the races of tomorrow in the engineering magazines. They will provide a good show. Now that the *Engineer* is really the organ of the whole College there's an added incentive to write to the best of your ability *of* the engineer and *for* the engineer.

JOHN M. WEED,
Acting Junior Dean.
