# Alumnitems

Ray Schmitt, C.E.IV

Roy Underwood, C.E. '41, took a 12 weeks' training course for a commission as Ensign, U.S.N.R., at New York University during the past summer. Out of a class of 36, Roy came through "on top". This was followed by a quick spin across the "continent" where he is now stationed at the naval base in Seattle, Wash. Although he'd like to spend more time in his cozy little apartment, he finds increasing work at the base. He's finding it a little difficult to get used to the "blackouts" on the coast.

Robert Schmitt, I.E. '41, has also completed preliminary training for a commission in the Navy and will now teach in the Naval Gun Factory's ordnance inspectors' school. His final assignment will probably be to one of the new plants producing naval equipment. He says that there is a heavy demand for engineering graduates. At present, "Bob" is located in Washington, D. C.

Frank Brevoort, M.E. '41, signed up with the Dupont Co. and is now employed at Charleston, W. Va. His specialty is the "Nylon" department. Frank had an operation last year which slowed him up a trifle. However, he's over the ill effects now. Why, even the army is after him again, and he's scheduled to appear for a "physical" next month.

Paul Stamm, C.E. '41, is connected with the Federal Housing Administration in Detroit. They keep him busy on one of their projects as field engineer. Paul started the job two weeks after graduation and likes his work tremendously. But, will the Army get him? Well, not until next May anyhow.

Arthur H. Laube, Ch.E. '41, who has been taking graduate work in his department underwent an appendectomy on January 15 and is rapidly recovering. Art is also a member of the Officers' Reserve Corps, Corps of Engineers, and subject to call to active duty.
