LINCOLN ARC WELDING FOUNDATION OFFERS PRIZES TO STUDENTS

The James F. Lincoln Arc Welding Foundation, sponsor of several nationwide arc welding award programs, has recently announced its first award program in the field of undergraduate engineering study.

The foundation's new project is "to encourage engineering students to study arc welding construction so that their imagination, ability, and vision may be given opportunity to extend knowledge of this method and thus aid the war effort and economic reconstruction in the peace which is to follow."

The program offers \$5,000 in student awards and \$1750 in scholarships for the departments of the institutions in which the award-winning students are registered. There are 77 student awards—the first award of \$1,000, second of \$500, third of \$250, four awards of \$550, eight of \$100, twelve of \$50, and fifty of \$25.

There are seven scholarships of \$250 each. The school of the first award winner will receive four scholarships totaling \$1,000; the school of the second winner will receive two scholarships totaling \$500; and the school of third winner will receive one scholarship of \$250. The winning students will receive an additional honor, since the scholarship in his school will carry his name.

Any engineering undergraduate student is eligible to submit a paper in the award program. The awards will be made for papers describing the conversion from other methods to arc welding construction of parts of machines or structures.

Professor E. E. Dreese, head of the Department of Electrical Engineering at Ohio State University, who is Chairman of the Board of Trustees of The James F. Lincoln Arc Welding Foundation, will be in charge of the selection of the jury.

The papers have to be submitted to the jury before April 1, 1943. Further information concerning the program and the papers may be obtained from the chairmen of the various departments.
