
NEWS AND NOTES.

The annual meeting of the Ohio Academy of Science will be held at Delaware, Ohio, on the 26th and 27th of November.

THE MOCKING BIRD IN GALLIA COUNTY.

Four years ago, the first Mocking Bird, *Mimus polyglottus*, was seen at Rio Grande. Its nest was not found. This year at least five nests were found within the village and the birds seem quite numerous through the country. Heavy winds overturned three nests and the young ones perished in spite of human efforts to replace and strengthen the nests.
