
MEETING OF BIOLOGICAL CLUB.

ORTON HALL, Dec. 4, 1911.

The meeting was called to order by the President, W. M. Barrows. The minutes were read and approved. The Club then had the pleasure of listening to an interesting lecture by Prof. Herbert Osborn on "Some Collecting Trips in Western States." The trips of which Prof. Osborn spoke carried him through about forty states and territories. Their principal object was the study and collection of Jassidae affecting various forage crops. Certain of these insects were found to be strikingly adapted to conditions which must have prevailed for a long period of years. The talk was illustrated with a number of excellent lantern slides and was followed by an interesting discussion.

The meeting closed after a short business session in which Messrs. Schlopp, Mote, Busby and Bilsing were elected to membership.

C. L. METCALF, Secretary.
