Building an Energetic Community of
Ohio Mathematics Educators

We've got The Cure for the Common Core

Common Core Edition © 2012 *Glencoe Algebra 1*, *Glencoe Geometry*, *Glencoe Algebra 2*

The Common Core State Standards (CCSS) initiative is just one way the educational community is ensuring that students across the country have the 21st century skills they need to be successful today, tomorrow, and in the future. Our newest textbooks—*Glencoe Algebra 1*, *Glencoe Geometry*, and *Glencoe Algebra 2*—ensure that educators have the resources and support they need to be successful in integrating the CCSS into their curricula.

The content in these new editions is specifically designed to meet the CCSS and the unique needs of all learners—whether they are at, below, or beyond grade level. The CCSS are documented throughout each lesson so no additional components or resources are needed.

Alignment to the CCSS is just the beginning...

- In-depth, rigorous math lessons with built-in differentiation that enables you to tailor instruction to all levels of learners
- Seamless Response to Intervention (RtI) approaches including diagnostics and prescriptions for all three RtI levels
- Thousands of digital resources for students and teachers including ebooks, games, tutorials, virtual manipulatives, and videos—all housed in one easy-to-access online portal, *ConnectED*
- Compatibility with handheld technologies such as TI-84 and TI-Nspire™

A Publication of the Ohio Council of Teachers of Mathematics

Ohio Journal of School Mathematics Call for Manuscripts

The *Ohio Journal of School Mathematics* is the journal of the Ohio Council of Teachers of Mathematics. It is intended to be a medium for teachers from elementary to college level to present their ideas and beliefs about the teaching and learning of mathematics. Mathematics educators at all levels are encouraged to submit manuscripts for upcoming issues of the Journal.

Although research studies are not emphasized in the *Journal*, practical application of research implications is appropriate.

GUIDELINES FOR MANUSCRIPTS and ACTIVITIES

Manuscripts should be double-spaced with one-inch margins, 11 point Times New Roman font, and a maximum of 8 pages. References should be listed at the end of the manuscript in APA style. Please include appropriate information such as author, journal or book title, publisher, date, and pages.

Original figures, tables, and graphs should appear embedded in the document – both in the electronic and hard copy forms. Please do not use text boxes, footnotes, or head-notes.

One hard copy and an electronic copy are required. The electronic copy may be in Word. The electronic copy should be submitted via an email attachment to elaughba@math.ohio-state.edu. Author name, work address, telephone number, fax, and email address must appear on the cover sheet. No author identification should appear on manuscripts after the cover sheet. (The editors of the *Ohio Journal of School Mathematics* use a blind review process for manuscripts. Classroom activities are not peer-reviewed but undergo a rigorous revision process in consultation with the editors).

Submit manuscripts to *Ohio Journal of School Mathematics*, Journal Editors.
