NEW YORK

*Most of the famous buildings of the world
are equipped with Otis Elevators*

THE WOOLWORTH TOWER—the tallest office building; the Equitable—the largest; the Singer Building—in fact most of the buildings that make up the best known sky line in the world, are equipped with Otis Elevators.

Few people realize the amount of wealth of Manhattan Island that is due to the creation and development of modern vertical transportation by the Otis Elevator Company. New York City could not grow wider hemmed in as it was by the two rivers and the bay. It *had* to grow skyward.

And now, the Otis Elevators in New York City carry daily more than twice the number of passengers carried by all the traction lines of New York—subway, surface, elevated and railroads.

Nothing short of a book would adequately tell the story of Otis in New York alone.
