STUDENT RECOGNIZED IN ARCHITECTURE
CONTEST

SECOND SPRINGFIELD MAN IN TWO YEARS IN FRONT
RANKS OF ROME PRIZE CONTESTANTS

For the second time in as many years, a graduate of the Department of Architecture, Ohio State University, has finished in the front rank of nation-wide competition for the "Rome prize" in architecture. The award, considered the outstanding one of its kind in architecture, is made annually by the American Academy in Rome.

Last year Arthur F. Deam, formerly of Springfield, Ohio, won first place in this competition, which carries with it three years abroad and a stipend of \$1,500. According to word just received here, Clarence D. Badgeley, also formerly of Springfield, finished second in this year's competition, which recently ended.

Deam has been in Rome and traveling in Europe since last summer. He is entitled to two more years there. Although Badgeley has only the consolation of being runner-up this year, he is considered to have achieved real distinction in placing second. Deam was graduated in 1922 here, while Badgeley completed his university course in December last.

The Rome prize competition is annually open to all college men in the United States as well as to other architectural draftsmen of recognized experience. Final award is made after a series of eliminations.
