

Bibliography of Publications *by* Paul B. Sears (1891-1990)

JULIANA C. MULROY¹, Department of Biology, Denison University, Granville, OH and JANET L. OBLINGER, Department of Pathology, The Ohio State University, Columbus, OH

ABSTRACT. Paul B. Sears authored or coauthored more than 550 publications from 1914 to 1988. They included journal articles, abstracts or complete papers presented at meetings, book chapters, books, magazine articles, letters, many book reviews and editorials. Subjects discussed ranged from entomology and cytology to palynology/paleoecology to many aspects of ecology, conservation and conservation education. Numbers of publications peaked in several years of the 1950s, ranging from 20 to 30 per year. This bibliography is largely complete, but items may well have been missed because Sears was so prolific. This listing was current circa 2005.

OHIO J SCI 109 (4-5): 128-136, 2010
