## FOR SUMMER READING

**N**OW summer is coming, with its long days which will allow more daylight reading, and a great many engineers will be out on the job getting experienced in the duties which they expect to perform in that hazy and far distant future after graduation. If they are wise they will take a few books along, to fill in a Sunday afternoon, or rainy evening, or other times when amusement is not readily forthcoming. Therefore the following list of books has been selected, not with the intention of furnishing a reading course, but rather as a sample of what may be found at your bookseller or library. These books are all of recent publication, the oldest not being over a year or two old, while some of the most recent have been published but a few weeks, and have all been good sellers. An attempt was made to include about all of the types of fiction that an engineer would like, as adventure, romance, realism and a few biographies. It is hoped that this list will be an especial aid to those who are not familiar with the names most often seen on this winter's book covers.
