

# INTERCOMM

The Ohio State University at Lima

Autumn 1987

Lima Technical College

## Once Upon A Sunday at the Lima Campus

The tree-shaded courtyard at the Lima Campus was once again the setting for the Lima Art Association's (LAA) annual fund-raising event, "Once Upon A Sunday."

Over 12, 000 art-lovers visited the campus to view the 95 displays set up by artists and craftspersons from around Ohio.

Several additions and changes had been made for this year's event to accommodate the large crowd.

The children's area was enlarged and renamed "Celebration of Senses," which included several hands-on activities for the young attendees.

Also, several food booths were set up to accommodate the hungry festival-goers.

Jazz musicians from the Lima area performed non-stop from noon until 5 p.m. The musical program included Innovation, Don Hurless and the Gaslight Gassers.

## The First Annual Lima Sculpture Show

Five red buttons sewn into the ground, a zig-zag leading into the woods, and a treehouse emerging as the leaves fell. Visitors and students at the Lima Campus were wondering what was happening.

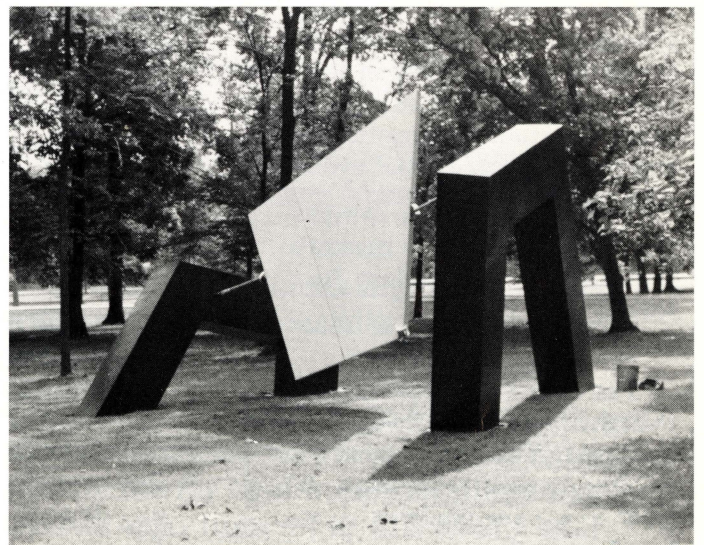

"We'll have to tell them they have entered a cultural haven," said Ellen Nelson, director of the Lima Art Association (LAA).

Eight Ohio artists had been commissioned to create site-specific, temporary outdoor sculptures on the Lima Campus. The sculptures were viewed from September 7 through November 1, 1987.

Mike Costello's "Ceremonial Space II" won the jurors' first-place prize and Lima artist David Lepo won the People's Choice Award.

# IN THE NEWS

## LIMA CAMPUS —

Dr. James S. Biddle, 52, announced in mid-October that he will retire from OSU Lima and LTC in August 1988. Biddle will be taking advantage of the 5-year buy-out program offered by OSU. The national search for a replacement will begin before the calendar year is over.

## LIMA TECHNICAL COLLEGE —

National Respiratory Care Week was celebrated by the LTC Respiratory Care program from October 4-9. A symbolic balloon

### Student Activities: Busy As Usual

It's just an ordinary quarter for Student Activities Coordinator Carole Enneking and Graduate Intern Frank Tascone.

So far this year, the office has organized a Halloween bonfire, a treasure hunt, held elections for student senate members, and conducted a student leadership retreat. All this in addition to the daily programming of the noon entertainment series, overseeing 18 students organizations, and coordinating special events.

Tascone, new to the campus this fall, is pursuing a master's degree in College Student Personnel from Bowling Green State University.

"I'm a lot busier than I thought I was going to be," said Tascone. "This campus has a lot to offer commuter students. It's great to see the students so active," he said.

launch was held in the courtyard to signify the event.

A re-opening ceremony was held in October to acknowledge various donations made to the LTC radiography department. The department received x-ray equipment from Lima Memorial Hospital and several hours of clinic time from St. Rita's Medical Center.

Robert A. Casto, Director of Respiratory Care at LTC, has been named "Administrator of the Year" by the Ohio Association of Two-Year

Colleges.

Casto, Associate Professor and registered respiratory therapist, has been the director of the respiratory care program at LTC since 1979.

## A New Director and A Fall Production for the Theatre

The Lima Campus Theater Department lifted the curtain this fall with the production of three one-act plays and a new director, Kevin Hayes.

The performances were held on Friday, November 13 and Saturday, November 14 at 8 p.m.

Hayes, who holds master's degrees in Fine Arts and Education from The Ohio State University was hired in September.

*Graceland* was the first of the three plays. The comedy, first produced in 1983, focused on two women, both wanting to be the first inside Elvis' mansion.

A psychological thriller followed the first play. *Eris (The Night Peole)* took place late at night on a bridge over the Hudson River.

The final show, *It's A Sin To Tell A Lie*, featured an old man

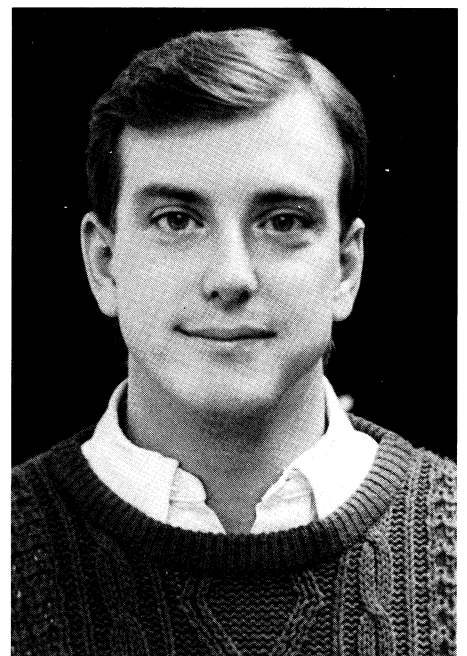

## THE OHIO STATE UNIVERSITY — AT LIMA

OSU Lima will be offering its first telecourse, Winter quarter, 1988. "The Constitution: That Delicate Balance" will be shown on WTLW, channel 44.

OSU has adopted two new identification logos. The designs are to be used for commercial applications such as mugs and t-shirts. The logos were designed by OSU students.

and an old woman waiting in a doctor's office. Focusing on the concept of truth, the story evolved into a geriatric lovestory.

# Centers of Excellence at LTC

Two programs at Lima Technical College have been designated "Centers Of Excellence" by the Ohio Board of Regents through the Selective Excellence Program.

The Office Secretarial program was chosen as a Center of Excellence in 1985 and received the second installment of three in July, 1987.

The Office Secretarial program has purchased several Personal Computers, the IBM System 36, and has invested in professional development for the faculty with the grant money.

Also in July, the LTC Dental Hygiene Program was honored with this award.

Dental Hygiene Director Linda Leshner is looking at some video equipment, a closed-circuit television system and professional development programs to invest in with her grant.

Both programs will receive over \$300,000 as a result of winning this award.

The Selective Excellence initiative guarantees financial resources to strengthen programs; creates incentives for all public universities and two-year colleges; and provides funds for additional resources that will raise programs to excellence.

## Not A Moment Too Soon

The 12,000 foot expansion of the Technical Education Laboratory is completed. Faculty and staff began moving into the remodeled and expanded building on Monday, September 21.

Classes began Wednesday, the 23rd.

The addition provides badly needed space for the engineering and business divisions.

## Roller Offers Art & Archaeology Course

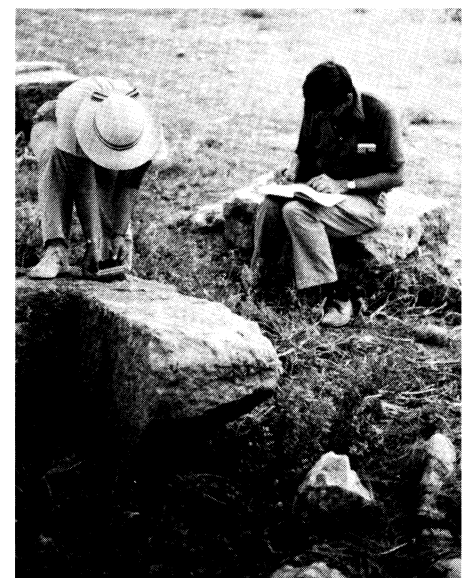

The Lima Campus will be offering, for the first time, courses in Greek and Roman art and archaeology. The course, Classic 294, will be offered for the first time Winter quarter 1988.

Duane Roller, Associate Professor in Classics, will teach the course. Roller has excavated in Greece, Israel, Jordan and Turkey.

Classics 294 will examine physical monuments of the ancient Greeks including sculpture, architecture, painting, and the minor arts. The course will cover the impressive remains of the Bronze age and continue through the rise of the Greek

city-states and the glories of classical Athens.

A Roman Art and Archaeology course will be offered next winter quarter.

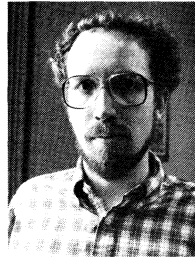

# IN THE SPOTLIGHT

IN THE SPOTLIGHT, a column featuring an OSU Lima employee and a LTC employee, will appear in each issue of **Intercomm**.

## The Ohio State University at Lima —

Bill Kinkead picked the right profession. He looks approachable. So if you don't understand why  $x$  equals  $y$  or why  $3y$  to the second power doesn't equal 78, you can ask him.

He looks sincere. I'd even believe him if he told me I'd use math again in the future.

The recipient of the 1986-87 Distinguished Teaching Award says he likes the Lima Campus because of the attitude of the students.

Bill said that the students at OSU Lima want to learn. "They appreciate the effort that is put into a class," he said.

Bill has been a lecturer of mathematics at OSU Lima for two years. He received his bachelor's degree from Clarion State College in Pennsylvania majoring in mathematics and his master's at Bowling Green State University.

Bill plans to pursue his Ph.D. in mathematics at the conclusion of this academic year.

Good choice, Bill!

## Lima Technical College —

If you've been around Randy McCullough before, you will recognize his laugh. It's an infectious, happy laugh, the kind of laugh that you like to be around and Randy is the kind of person you like to be around.

Randy has been the Controller in the LTC Business Office since 1979.

He smiled when I asked him what he likes about the Lima Campus. "The people I work with are the reasons I like to come to work. Everyone is a friend," he said.

Before coming to LTC, he worked as a CPA in Ashland, Ohio. Randy holds a bachelor's degree in accounting and mathematics from Bluffton College.

"The different activities the College is involved with and the different people I deal with make my job really interesting," he said.

If you have a problem or question for the business office, give Randy a call. Don't be surprised if you can't get a hold of him right away, he'll probably be helping someone else.

Randy and his wife Kim, live in his hometown of Pandora in Putnam County. They have four children: Karen, Kristen, Ben and Sam.

# New Faces on Campus

## Welcome Full-time Faculty and Staff

**Mary Bensman**  
Coordinator  
Education Center  
(OSU)

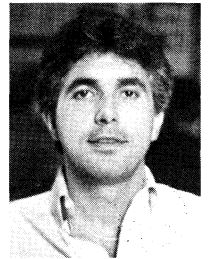

**Joann Clark**  
Switchboard Operator  
(OSU)

**Lois Deleruyelle**  
Director  
Nursing Technology  
(LTC)

**Fatholah Kassemi**  
Lecturer  
Mathematics  
(OSU)

**Bill McKinney**  
Coordinator  
Athletics  
(OSU/LTC)

**Jane Mead**  
Instructor  
Dietetics  
(LTC)

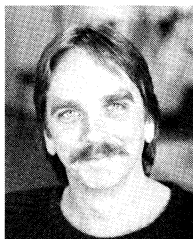

## More New Faces . . .

**Wesley Perusek**  
Assistant Professor  
Education  
(OSU)

**Dennis Shramek**  
Lecturer  
English  
(OSU)

**Rosie Stammen**  
Typist 2  
4th floor Faculty  
(OSU)

**Therese Stewart**  
Assistant Professor  
Education  
(OSU)

**Jennifer Taylor**  
Lecturer  
English  
(OSU)

**Brian Thompson**  
Groundskeeper  
(OSU)

**Tilly Timmons**  
Clerical Specialist  
Registration  
(LTC)

## Machor Publishes

*Pastoral Cities: Urban Ideals and the Symbolic Landscape of America* is a new book published by James Machor, Associate Professor of English.

The book, recently released by the University of Wisconsin Press, focuses on American conceptions of and responses to urbanization in light of our culture's fascination with nature and rural values.

Machor explores a wide range of material, from urban plans and travel narratives to sermons, novels, and poems.

"This urban-pastoral ideal is of particular interest because it has played an important role in our evolving national identity," says Machor.

"In America today, the ideal continues to have a major influence in urban park planning, in home design, in the works of major authors, and in the imagery of popular media," Machor added.

## Dietetics Gets Okay

The Dietetic Technology Program at LTC has received final approval from the American Dietetic Association (ADA).

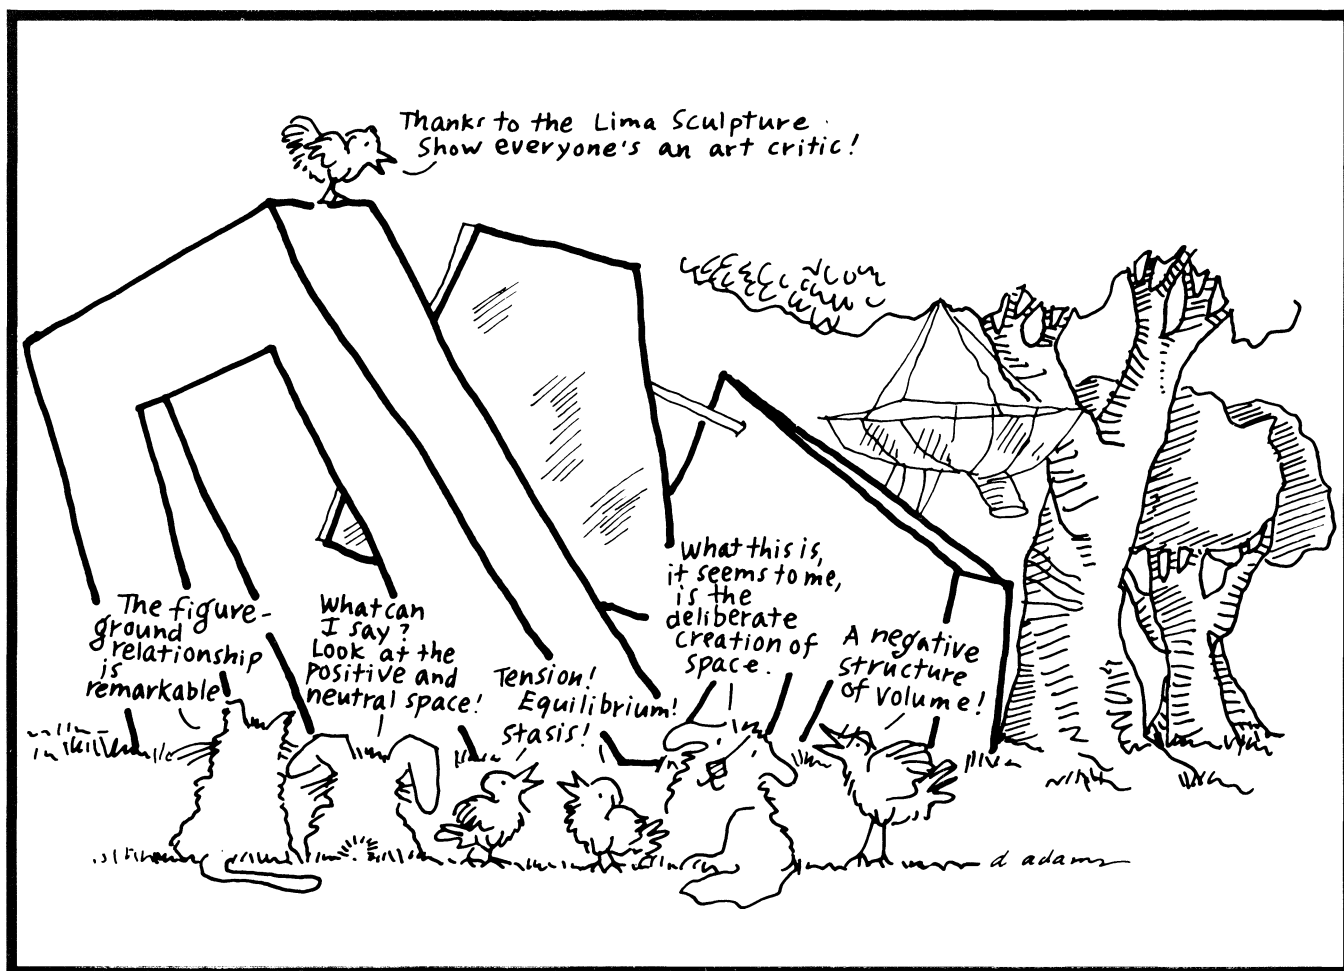

The program offers two associate degree majors and a one-year certificate option.

In May 1987, the Nutrition Care program received approval and in August, the Foodservice Management major got the go-ahead from the ADA.

The one-year certificate program was approved by the Dietary Managers Association in 1986.

The Dietetic Technician Program was developed in 1986 because of community demand.

"The increasing demand for wellness and preventative health care as well as federal requirements for health care facilities has increased opportunities in this field," said Maxine McCabria, Director of the Dietetics program.

Contribution from Dr. David Adams, Associate Professor, Sociology, OSU-Lima
