CHIT-CHAT

EDMUND DUPLAGA, Ch.E. IV

1-2-3-4-5-6-7-8-9-10

Here I go again!

Clifford V. Heer (Eng. Physics IV), president of the Engineer's Council, named the following committees which helped to make Engineers' Day a success: General arrangements were coordinated by Edwin G. Willing (Ch. E. IV). The program committee consisted of Bernard W. Hatten (Ag. E. III) and Robert Fisher (Me. IV); the float committee, Roy Maddux (Weld. IV) and Walter E. Hendricks (Weld. III); departmental exhibits, Robert B. Livensparger (E.E. IV) and Robert J. Reel (M.E. III); awards, Richard M. Tresemer (Met. E. IV); judges, John O. Semmelman (Cer. E. IV); and publicity, Harold L. Geiger (Ag. E. IV), Donald S. Arnold (Chem. Engr. IV), Harold R. Haviland (I. E. III), and Edward J. Driscoll (Met. E. III).

How Times Have Changed!

1892—May I have the pleasure of this dance?

1942—Let's struggle, babe.

1892—Good evening, Mrs. Smith, is Mary ready?

1942—Honk! Honk! Honk!

1892—You're the vision of loveliness, tonight.

1942—Say, kid, you're the nuts.

1892—Won't you let me show you home in my carriage.

1942—Hop in the crate and we'll truck on home. Congratulations!

David Francis Bowman (E. E. IV), Norman E. Bradstock (C. E. IV), Raymond H. Dick (Met. IV), Evan Lloyd Jones (I. E. IV), Robert L. Flower (EE. ME. IV), and Samuel A. Riccardi (Chem. Engr. IV) were recently initiated by Sigma Xi, national honorary society for promotion of scientific research, and we engineers offer them our heartiest congratulations and are proud to be so well represented in this society. (Let's keep up the good work, boys!)

Did You Know That—

"Charley's Aunt", the farcical comedy presented by the Quadrangle Jesters, was a tremendous success? (Thanks, fellows, for your hearty support.)

Traffic jams cause fewer accidents than pickled drivers?

Woman, generally speaking, is generally speaking?

This is the last issue of the Engineer for the present school year?

Sports!

The engineering college, through Keith McFarland (I.E. III) and Harold Hall (Chem. Eng. IV), holds the University badminton doubles championship for 1942. While these boys took care of the doubles, Wil-

liam Kolins (Chem. Engr. IV) upheld his share by winning the badminton singles championship.

In Engineering League I the Mining-Metallurgy team is the ruler in softball and will play the winner of the tussle between the Chemical Sophomores and the Mechanical Engineers, who have tied for the crown in the Engineering League II for the College of Engineering Championship of 1942. The Mechanicals won both games to take the championship.

At a banquet of the entire staff of the Ohio State Engineer at Pomerene Hall, Donald S. Arnold (Chem.Engr.IV), retiring editor, announced that Gordon C. Inskeep (Chem.Engr.III), will be the new editor for next year, while Russell Bartholomew (I.E. IV), retiring business manager, announced that David J. Masson (M.E. III), will take over the business activities. The appointments were made by the Board of Control with Dean Charles E. MacQuigg, College of Engineering, chairman.

There's One Born Every Minute

Now down yonder Ohio State way,
You can see 'most any day,
Students strutting down the street,
To the armory a path they beat.
Conductors' hats upon their head,
Brass buttons on their chest,
Medals, badges, and all the rest.

They call them the R. O. T. C.
Future generals they would be,
Their uniforms so smart and trim,
The girls all say, "Just look at him."
But as for me, before I can wear
A uniform like that one there,
Drafted in the army must I be,
And study and train to educate me.
