

Bibliography of Publications *Relevant to Paul B. Sears (1891-1990)*

JULIANA C. MULROY¹, Department of Biology, Denison University, Granville, OH and JANET L. OBLINGER, Department of Pathology, The Ohio State University, Columbus, OH

ABSTRACT. Paul B. Sears and his work were discussed in hundreds of publications beginning in 1908. They included high school and college yearbooks, reviews of his books, newspaper articles, award citations, letters, biographies, and obituaries. The greatest number of publications (more than 50) mentioning Sears appeared in the 1930s. This listing may not be complete because of extensive editing, losses and additions since first compilation in 1994. It is an entry point to understand Sears' influence on the fields of ecology, conservation and education.

OHIO J SCI 109 (4-5): 137-139, 2010
