

ERRATA

The Editor regrets that when the January, 1986, copy of the Journal was prepared, the diagram included below was omitted. It should have been included on page 20 in the space where the Mind Stretchers were included. It is a diagram illustrating some of the material included in the article THE GEOMETRIC PROBABILITY DISTRIBUTION by Kullman and Skillings.

Membership Information

To determine when your membership in OCTM expires, look at the address label on this Journal. If there is a four-digit number such as 8703, it means that membership expires in March of 1987. If the number is 9999 or 9998, it means that you are a life member. If OEA appears on the label, it means that you have paid your dues through OEA. If MC or OCTM appears, you have paid the dues directly to OCTM.

If you receive a notice to renew your membership and it says FINAL NOTICE at the top, you must respond with your renewal payment within one month or you will be dropped from the membership list.
