DIETZGEN

Drawing Instruments

In addition to special features which are an aid to accurate and fast work, the superiority of DIETZGEN Drawing Instruments is due to the metals used, their quality, method of treatment, and skilled workmanship.

They have that "nicety of balance" and "ease in handling" that insures *better work*. Made for every use. Sold at reasonable prices, too!

Our catalog fully explains the respective merits of our different grades.

*Perhaps you have a copy;
if not, write for one today.*

EUGENE DIETZGEN CO.

What chance have you got against him?

IT was a cynic who said: "Some men go to college. Other men study."

A slander! But yet there probably are college men whose bills for midnight oil are not large.

And there are men who left school in the lower grades who, along with a hard day's work, put in long hours of study—spurred on by a dream and a longing.

Look out for them.

The achievements of non-college men in business suggest an important fact. Success seems to depend, not so much on the place where a man studies, as on the earnestness of the student.

But, granting equal earnestness and ability, it is still true that the college man has the advantage.

Regular hours for study and lecture, the use of library and laboratory, the guidance of professors, contact with men of the same age and aspirations—all these will count in his favor, *if he makes the most of them.*

A big "if." The new year is a good time to start making it a reality.
