Ohio State Engineer

- Title:** Civil Engineers
- Issue Date:** May-1938
- Publisher:** Ohio State University, College of Engineering
- Citation:** Ohio State Engineer, vol. 21, no. 7 (June, 1938), 16-17.
- URI:** <http://hdl.handle.net/1811/35541>
- Appears in Collections:** [Ohio State Engineer: Volume 21, no. 7 \(June, 1938\)](#)

CIVIL ENGINEERS

EMERSON BOSTWICK. Joe really blossomed out in his final year. He is no longer the quiet mouse of former years. In fact he is quite boisterous. He has gone in for so many activities that he has broken his thumb and is starting to limp slightly. Mother won't know her little boy by the time this year is over.

CHARLES CAMPBELL. Charlie is best known as the Casanova of summer camp. He really is Carrollton's greatest claim to fame. As a gum chewer he has no peers. It is stated by the statistics department that the money spent on gum by this lad would compare favorably with the national debt.

LOYD GILBERT. Loyd probably will be one of those men whose lot it is to benefit mankind. He has developed and manufactured a loading device that in the future will save the civil engineer hours of toil. This device is a loading scale for railroad bridges.

CHARLES GUARD. Charlie is the class's genius. He is one of those men who get hundreds on midterms without studying for hours and hours. But what the amazing part of it all is, he is a regular guy.

MAURICE GUMP. Meg is our little general. He is Hitler's greatest worry. Meg's hobby is military strategem. He is also quite a cornetist and claims that he will either lead an army or a band.

ROBERT HALL. Bob is the lad with the, shall

we say, different laugh. His friends tell him jokes just to hear him laugh. Bob is also a member of that fast vanishing race, men who blush.

JOHN HANLON. "Ace" claims to have the best formula for taking midterms. All that is necessary is to give them the "triple check," and you will be correct, maybe. Ace is continually trying to sell the boys on coal mining. He claims it is very interesting during explosions.

WESLEY HUNTING. Wes is one of those students who continually worry about grades and yet he has a beautiful point average. He says he hardly ever smokes and at the same time keeps the tobacco business booming. Wes is one of the most reticent but well liked of all the civils.

ROBERT HUYSMAN. Bob is the pipe smoker of the class. He always has that sweet smelling article in his mouth. He is doing his thesis over in the Concrete Lab, under Professor Large and he claims that Professor Large is learning a lot.

ROBERT KIBELE. "Uncle Meyer," as he is called, is the class wit. He has the soul of a humorist and the talents of an artist. You can imagine the results. He makes a highly technical class seem like an Olsen and Johnson revue.

JOHN KIRKWOOD. I can hardly tell what a nice guy I am, can I?

WALTER KUENNING. This gentleman is the practical joker of the class. Although he brought no snakes to class there are not many things Walt overlooked. He is the lad that made a miniature radio tower, that was being used on a thesis, into a home for the Seven Dwarfs.

THOMAS MURTAUGH. Tom claims his findings that arose from his thesis work will startle sanitary engineers. They probably will but not the way he means. Tom also says that after five years of college, one should be a good engineer and his professors are beginning to see his way of thinking.

JOHN McCALL. John says that he is the only civil that goes to church and he can prove it because he has a basketball jersey with his church's name on in red letters. John has had the good or bad luck of having his thesis partner drop out of school at the beginning of this quarter.

JOSEPH MONARCHI. Joe is president of the student chapter of the American Society of Civil Engi-

neers and as popular as the office signifies. Joe claims that when he gets out, or graduates, he'll be president of the Married Men's Association.

RICHARD SLOANE. Dick took Spanish just so he could write his senora in Argentina. Instead of spending his money on a Friday night date he blows himself to a forty cent air mail letter to Argentina twice a week. Dick deserves to be congratulated for the fine work which he did as editor of THE ENGINEER.

JOHN TILTON. John was not with the class for the full four years. He has been with the civils for just his final effort, but everyone who knows him likes him. He claims that his thesis results on vibrated concrete are different to say the least. They probably are.

MORLEY SMITH. Super Smooth Smitty, the best dressed civil, is miscast as an engineer. He is, without a doubt, the ideal tie salesman. It is very irritating to his fellow classmates to go to a lab class in their working clothes and find Smitty in his English tweeds looking quite bored.
