## Engineers Club of Columbus

By M. Z. BAIR, Secretary.

The Engineers Club of Columbus which was originally organized in 1888 was reorganized last spring and at present has a membership of two hundred and thirty. The most prominent engineers in the city are members of the club, including a large number of the faculty of the University.

The regular meetings are held the last Friday of the month, except the summer months. During the past winter the club has been addressed by a number of out-of-town speakers on engineering in relation to the war. Several dinner meetings have been held which proved very successful.

The object of the club is the advancement of engineering knowledge and practice, the fostering and expression of interest in civic activities, professional improvement of its members, and the encouragement of social intercourse. There are numerous committees which keep in touch with civic improvements and cooperate with other clubs and civic organizations of the city with a view to advising, particularly in matters of an engineering character.

Members are classified as active, associate and junior. Candidates for active membership must have had at least five years' experience in engineering work, and engineers who have had less than five years' experience or engineering students are eligible for junior membership. Graduation from a recognized technical school will be accepted as equivalent to two years' active practice. Associate members include persons associated with the profession of engineering.

The Engineers Club was the first organization in the city to recruit a company in connection with the organization of the Columbus Reserve Guards. Company A, or the Engineers Club's Company drills every Monday evening in the West Goodale Street Armory.

The following are the officers of the Club:

E. G. Bradbury, president; C. T. Morris, first vice president; J. J. Morgan, second vice president; F. H. Eno, treasurer; L. R. Lee, librarian; M. Z. Bair, secretary; directors, Philip Burgess, A. H. Hinkle, Thos. H. Brannan, Dudley T. Fisher.
