

BRUSH LAKE PROTOZOA.

LUMINA C. RIDDLE.

During the Fall of 1902 the writer studied and listed the Algae found at Brush Lake, Champaign Co., Ohio, and the list was published in Ohio Nat. 5:268; at the same time a careful record was kept of the Protozoa found in the same material and was reported at the 1903 meeting of the Ohio Academy of Science by Professor F. L. Landacre as the writer was at that time located in the West. Delay in publication has been due to the writer's anxiety for accuracy in nomenclature and citations. As far as has been possible the names have been arranged after Butschli's system, taking the classification from Calkins' "Protozoa" and Blochman's "Die Mikroskopische Thierwelt des Suesswassers."

My grateful acknowledgments are due to Professor Landacre, and to Professor L. B. Walton of Kenyon College, for the use of literature in revising the list.
