

Debtor Malice*

JONATHON S. BYINGTON**

This Article is about what malice should mean under bankruptcy law. Malice is used in other areas of law as a sorting function—to identify wrongful acts that are especially grievous. For example, criminal law uses malice to separate murder from manslaughter. The Bankruptcy Code uses malice to perform a similar sorting function. Bankruptcy law discharges or forgives certain kinds of debts. It separates debts that society is willing to forgive from debts that are not forgivable. One way it accomplishes this sorting function is through Section 523(a)(6) of the Bankruptcy Code, which excepts from discharge debts for “willful and malicious injury by the debtor.”

The Supreme Court has interpreted the word malicious to require “a wrongful act, done intentionally, without just cause or excuse.” But neither the Supreme Court nor the circuit courts have provided meaningful guidance on the degree of wrongfulness that is required. Because intentionally injuring another is inherently a wrongful act, there should be a difference between a mere willful injury and the required “willful and malicious” injury. In addition, a circuit court split has developed on whether malicious requires intent, and if so, what level of intent. This Article seeks to clarify the meaning of malicious. It explains why courts should stop construing malicious to require intent. It also recommends the definition of malicious be changed to require an “extraordinarily” wrongful act so that malice can accomplish its sorting function.

I. INTRODUCTION

This Article explores what malice should mean under bankruptcy law. Malice is utilized in other areas of law as a sorting function—to identify wrongful acts that are especially grievous. For example, criminal law uses malice to separate murder from manslaughter.¹ Tort law employs malice to

¹ Compare 18 U.S.C. § 1111(a) (2012) (“Murder is the unlawful killing of a human being with malice aforethought.”), with *id.* § 1112(a) (“Manslaughter is the unlawful killing of a human being without malice.”). See generally 2 CHARLES E. TORCIA, WHARTON’S CRIMINAL LAW §§ 139, 153 (15th ed. 1994) (stating that at common law and by statute in

describe conduct that justifies imposing punitive damages.² The Bankruptcy Code uses malice to perform a similar sorting function. Bankruptcy law discharges certain kinds of debts.³ It separates debts that society is willing to forgive from those that are not forgivable. One way bankruptcy law accomplishes this sorting function is through exceptions to the bankruptcy discharge.

Victims of a debtor's bad conduct occasionally request bankruptcy courts to not discharge the debts owed to them. Section 523(a)(6) of the Bankruptcy Code excepts from discharge debts "for willful and malicious injury by the debtor."⁴ The Supreme Court has interpreted the word malicious to require "a wrongful act, done intentionally, without just cause or excuse."⁵

The Bankruptcy Reporter is crowded with examples of debtors who intentionally engaged in wrongful acts without a just cause or excuse. For instance, one debtor took his former girlfriend's Ferrari and hid it despite demands to return the car.⁶ Another debtor put his car in reverse and intentionally collided it into a vehicle that was directly behind him.⁷ One debtor sexually harassed an employee.⁸ Another violated a non-compete agreement by

LAFAVE, *CRIMINAL LAW* 765–66 (5th ed. 2010) (providing a history of murder and observing that "it will not solve modern homicide cases to say simply that murder is the unlawful killing of another with malice aforethought, that manslaughter is the unlawful killing of another without malice aforethought, and that no crime is committed if the killing is lawful"); MODEL PENAL CODE AND COMMENTARIES, Part II § 210.2 cmt. 1 (AM. LAW INST. 1980) (explaining that the phrase malice aforethought is "used by judges to signify any of a number of mental states deemed sufficient to support liability for murder"); Lee R. ² W. PAGE KEETON ET AL., *PROSSER AND KEETON ON THE LAW OF TORTS* 9–10 (5th ed. 1984) ("Something more than the mere commission of a tort is always required for punitive damages. There must be circumstances of aggravation or outrage, such as spite or 'malice,' or a fraudulent or evil motive on the part of the defendant, or such a conscious and deliberate disregard of the interests of others that the conduct may be called wilful or wanton.") (citations omitted).

poaching clients from his former employer.⁹ One debtor recklessly shot a paintball gun in a residential neighborhood and injured someone.¹⁰ Prior to surrendering his truck to his lender, one debtor used his key to scratch the paint, removed the “F-150” emblems, and smashed the dashboard interface screen.¹¹ Another debtor posted nude photographs of a woman, along with her home address, on a revenge porn site.¹² One debtor drove his vehicle twelve miles per hour over the speed limit and ran a red light (which was determined to not be malicious),¹³ while a different debtor was found to have been malicious when he crept his car forward at a speed of one to two miles per hour toward a construction flagman, expecting him to get out of the way.¹⁴

These examples illustrate the variety of bad acts that some debtors commit. The Bankruptcy Code was designed to use malice as a way to separate bad acts that are forgivable from those that are not.¹⁵ The challenge with using malice to sort bad acts comes from the way the Supreme Court has defined it.¹⁶ Simply requiring a “wrongful act” is overinclusive because intentionally injuring another is inherently a wrongful act.¹⁷ Neither the Supreme Court nor the circuit

conduct was malicious: he subjected Plaintiff to severe or pervasive sexual harassment and his wrongful behavior was ‘without just cause or excuse.’”).

courts have provided meaningful guidance on the degree of wrongfulness that is required.¹⁸

Defining malice to require a wrongful act does separate acts that are wrong from those that are not. The problem is not all debts associated with a wrongful act should be excepted from discharge. In other words, debts related to some wrongful acts should be discharged in bankruptcy. For example, it may be a wrongful act for a debtor to intentionally refuse to pay a valid medical bill despite having sufficient funds to do so. But that type of wrongful act does not justify excepting the medical bill from the bankruptcy discharge.¹⁹ Consequently, the current definition of malicious does not separate among wrongful acts—it merely sorts acts that are wrong from those that are not. In order to properly sort, the definition of malicious should enable courts to segregate wrongful acts.

When applying the definition of malicious, many circuit courts have turned from the “wrongful act” element to the “done intentionally” requirement in an effort to accomplish the sorting function. They have split in the way they treat this intent-based requirement of malicious.²⁰ Complicating things further, in 1998 the Supreme Court held that the term “willful” in § 523(a)(6) requires “a deliberate or intentional injury.”²¹ This created overlap among the intent-based elements of the statutory terms “willful” and “malicious.” The overlap among the Supreme Court’s definitions of willful and malicious has not been reconciled.²²

This Article begins by looking at the origin and development of the term malicious in bankruptcy legislation and Supreme Court opinions. It also summarizes the limited scholarship on the meaning of malicious. It explains why courts should stop construing malicious to require intent. It then explores the way criminal and tort law determine wrongfulness and highlights the utility of the comparison method that is used for the tort of negligence. In harmony with this comparative technique, this Article recommends the definition of malicious in § 523(a)(6) be changed to require an “extraordinarily” wrongful act so that it accomplishes its sorting function.

II. BACKGROUND OF MALICE IN BANKRUPTCY LEGISLATION, SUPREME COURT DECISIONS, AND SCHOLARSHIP

This Part explores the historical development of the term “malicious” throughout statutory bankruptcy law and Supreme Court decisions. It also highlights the limited scholarly attention on the meaning of malicious.

A. Chronological Development of the Term “Malicious” in Bankruptcy Legislation

Neither the Bankruptcy Act of 1800,²³ the Bankruptcy Act of 1841,²⁴ nor the Bankruptcy Act of 1867²⁵ contained the word “malicious.” The term first appeared as an exception to discharge in the Bankruptcy Act of 1898.²⁶ Legislative history provides minimal insight on the meaning of “malicious.”

The provisions of the Bankruptcy Act of 1898 were substantially derived from the Torrey Bankrupt Bill, which was amended, adopted and recommended to Congress for enactment at the second session of the National Convention of the Representatives of Commercial Bodies of the United States in 1889.²⁷ As

²³ Bankruptcy Act of 1800, ch. 19, 2 Stat. 19 (repealed 1803). This act was primarily a creditor remedy against merchant debtors. See Charles Jordan Tabb, *The History of the Bankruptcy Laws in the United States*, 3 AM. BANKR. INST. L. REV. 5, 14 (1995).

²⁴ Bankruptcy Act of 1841, ch. 9, 5 Stat. 440 (repealed 1843). The Bankruptcy Act of 1841 was modeled after the Massachusetts Insolvency Law of 1838. CHARLES WARREN, *BANKRUPTCY IN UNITED STATES HISTORY* 70 (1935); Tabb, *supra* note 23, at 17.

²⁵ Bankruptcy Act of 1867, ch. 176, 14 Stat. 517 (repealed 1878).

²⁶ Bankruptcy Act of 1898, ch. 541, § 17(a)(2), 30 Stat. 544, 550 (repealed 1978) (“A discharge in bankruptcy shall release a bankrupt from all of his provable debts, except such as . . . are judgments in actions for frauds, or obtaining property by false pretenses or false representations, or for willful and *malicious* injuries to the person or property of another.” (emphasis added)).

HIST. REV. 86 (1998) (exploring how merchants and manufacturers used commercial associations to organize and lobby for a federal bankruptcy law).

[A] young lawyer living in St. Louis who had distinguished himself for his ability and great learning touching the bankruptcy laws in this country took an interest in this question, and at once his marked ability was recognized and he was made chairman of three national conventions to consider the question. I refer to Judge Jay L. Torrey, then a resident of St. Louis. . . .

. . . .

originally recommended by that convention, the Torrey Bankrupt Bill contained only three exceptions to discharge.²⁸ A willful and malicious injury was not one of them.²⁹

The Torrey Bankrupt Bill and several other bankruptcy-related bills were introduced in and rejected by Congress during the ten-year period before the Bankruptcy Act of 1898 was enacted.³⁰ The bills involved several disputed topics such as concerns over the cost of bankruptcy administration, whether bankruptcy should be voluntary or involuntary, and what the scope of the discharge should be.³¹ An 1893 report from the House of Representatives demonstrates the concern over both a voluntary bankruptcy system and the scope of the discharge:

The part of a bankruptcy law most difficult to draft is its voluntary provisions; they must not only provide relief for the honest bankrupt, but they must refuse relief or encouragement to the dishonest bankrupt. It would be quite easy to write a bill saying that the court should grant applications for discharges; the passage of such a law would result in good honest poor men getting discharges, and in so far it would be a good law, but it would also enable a lot of rascals to escape the payment of just debts, and in that respect it would be a bad law. The fact that all debtors might get a discharge, without the possibility of the interference of their creditors, would curtail credits and do untold harm to all of the members of that great class who conduct their various transactions on credit, and in that respect also would be a bad law. All of the scandals under the old law grew out of proceedings under its provisions for voluntary bankruptcy.

. . . At the Minneapolis convention, on motion of one of the delegates, the bill was named the “Torrey bill” in honor of this young man. He is now the speaker of the Wyoming legislature, a man of ability, modesty, and character.

28 CONG. REC. 5, 4535 (1896).

²⁸ A discharge in bankruptcy shall release a bankrupt, not a joint stock company or a corporation, from all of his provable debts, except such as (1) are due as a tax levied by the United States, the State, or municipality in which he resides; (2) have not been duly scheduled in time for allowance, with the name of the creditor, if known to the bankrupt, unless such creditor had notice or actual knowledge of the bankruptcy, or (3) were created by his fraud, embezzlement, or defalcation while acting as an officer or in any fiduciary capacity.

Torrey Bankrupt Bill, H.R. 3316, 51st Cong. § 53 (1889).

²⁹ *See id.*

³⁰ The Torrey Bankrupt Bill was originally introduced in the House of Representatives on December 20, 1889 by the Honorable Ezra B. Taylor, of Ohio, Chairman of the Judiciary Committee, as H.R. Bill 3316. It was introduced on several other occasions and was rejected several times. *See* 28 CONG. REC. 4678 (1896); 28 CONG. REC. 601 (1896); 25 CONG. REC. 124 (1893); 21 CONG. REC. 10208 (1890); *see also* Hansen, *supra* note 27, at 103–04 (summarizing several introductions and rejections of the Torrey bill).

The only ways yet discovered to keep the frauds under a voluntary law down to the minimum, are to make it possible for parties in interest to interfere, by commencing involuntary proceedings, before the fraudulent plans have been consummated and the property secreted or wasted, to provide adequate punishment for fraudulent acts, *and to refuse a discharge to dishonest bankrupts.*

The measure in question is an imperfect voluntary bill. It is not provided with effective safeguards for the protection of the rights of honest debtors or honest creditors, but is calculated to encourage every wrong which is known to rascals.³²

The congressional floor debates on the various bankruptcy bills from 1893 to 1894 do not mention an exception to discharge for a willful and malicious injury.³³ None of the bankruptcy bills that were introduced in December 1895 and January 1896 contained an exception to discharge for a willful and malicious injury.³⁴

Section 16(a)(2) of a bankruptcy bill introduced in April of 1896 contained an exception to discharge for “judgments in actions for frauds or willful and malicious injuries to the person or property of another.”³⁵ In 1897, the House passed a bill primarily derived from the Torrey Bankrupt Bill, and the Senate passed a different bankruptcy-related bill.³⁶ A conference committee was established to produce a compromise bill.³⁷ The House Report explains:

[S]ince the Torrey bill was first introduced in Congress it has undergone very many changes friendly in character. Each Committee on the Judiciary in three successive Congresses has made changes in this bill, growing out of full discussion and much thought devoted to the question. Judge Torrey himself

The bill which this committee recommends (H.R. 8110) has for its basis the Torrey bill, with the friendly amendments that have been made as above indicated, and the Committee on the Judiciary of the present Congress has spent many weeks in subcommittee and full committee in considering the bill by sections, and still perfecting it according to its best judgment to meet the needs of the country, and in doing this the committee has not failed to note and take advantage of all just criticisms that have come to its notice.³⁸

On July 1, 1898, the Bankruptcy Act of 1898 was enacted.³⁹ It labeled the exceptions to discharge as “Debts Not Affected by a Discharge” and stated in § 17(a)(2) that: “A discharge in bankruptcy shall release a bankrupt from all of his provable debts, except such as . . . are judgments in actions . . . for willful and malicious injuries to the person or property of another.”⁴⁰ Five years later, the term “judgments” was replaced with the word “liabilities.”⁴¹ The purpose of this amendment was to broaden the scope of debts excepted from discharge beyond those debts that had been reduced to a judgment.⁴²

In 1970, § 17(a)(2) of the Bankruptcy Act of 1898 was amended to add an exception to discharge “for willful and malicious conversion of the property of another.”⁴³ The amendment also added a new § 17(a)(8) clause on “liabilities for willful and malicious injuries to the person or property of another other than conversion as excepted under clause (2) of this subdivision.”⁴⁴

The Bankruptcy Law Reform Act of 1978 updated the exception to discharge to include the newly defined term “entity” and moved it to § 523(a)(6) as follows: “any debt . . . for willful and malicious injury by the debtor to another entity or to the property of another entity.”⁴⁵ In 1979, the Supreme Court

A House Report relating to the Bankruptcy Law Reform Act of 1978 stated “‘willful’ means deliberate or intentional. To the extent that *Tinker v. Colwell* held that a looser standard is intended, and to the extent that other cases have relied on *Tinker* to apply a ‘reckless disregard’ standard, they are

noted that “[d]ischarge provisions substantially similar to § 17 of the [1898 Act] appear in § 523 of the new law.”⁴⁶ The Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 retained the identical language of the 1978 Act in § 523(a)(6).⁴⁷ As the foregoing summary shows, legislative history provides limited help in determining the meaning of malicious.

B. *The Three Supreme Court Decisions Interpreting the Term “Malicious”*

Over the course of three decisions, the Supreme Court has interpreted the statutory term “malicious” to require a wrongful act that is done intentionally without just cause or excuse.⁴⁸ The determination of whether an act is wrongful is made from an objective perspective⁴⁹ and the circumstances surrounding a debtor’s act must be considered in determining whether it was wrongful.⁵⁰ The cases are addressed in chronological order.

1. *Tinker v. Colwell (1904)*

The first one, *Tinker v. Colwell*, was decided six years after the Bankruptcy Act of 1898 was enacted.⁵¹ In *Tinker*, a creditor obtained a money judgment against a debtor for the debtor’s criminal conversation with the creditor’s wife.⁵² Criminal conversation was a husband’s civil cause of action in tort against a man who engaged in sexual intercourse with the husband’s wife.⁵³ At that time, even if the wife consented to the act the husband had “personal and exclusive rights with regard to the person of his wife” and “such an act on the part of another man constitut[ed] an assault.”⁵⁴ The *Tinker* Court considered the

debtor's act "an injury to the person and also to the property rights of the husband" because it violated the exclusive marital rights of the husband.⁵⁵

To give meaning to the word "malicious," the *Tinker* Court quoted the following 1825 English case of *Bromage v. Prosser*, which involved the tort of slander, as providing a "good definition of the legal meaning of the word malice":

Malice, in common acceptation, means ill will against a person, but in its legal sense it means a wrongful act, done intentionally, without just cause or excuse. If I give a perfect stranger a blow likely to produce death, I do it of malice, because I do it intentionally and without just cause or excuse. If I maim cattle, without knowing whose they are, if I poison a fishery, without knowing the owner, I do it of malice, because it is a wrongful act, and done intentionally. If I am arraigned of felony, and willfully stand mute, I am said to do it of malice, because it is intentional and without just cause or excuse. And if I traduce a man, whether I know him or not and whether I intend to do him an injury or not, I apprehend the law considers it as done of malice, because it is wrongful and intentional. It equally works an injury, whether I meant to produce an injury or not.⁵⁶

The *Tinker* Court's adoption of the *Bromage* definition established the requirement of a wrongful act. In determining if an act was wrongful, the *Tinker* Court focused on the nature of the act and provided examples such as a person giving a blow likely to produce death to a perfect stranger, maiming cattle, and poisoning a fishery.⁵⁷ The nature of the act under consideration in *Tinker* was criminal conversation. The *Tinker* Court observed that "[t]he law will, as we think, imply that degree of malice in an act of the nature under consideration, which is sufficient to bring it within the [exception to discharge]."⁵⁸ In determining wrongfulness, the *Tinker* Court looked to the federal district court decision of *In re Freche*, which involved a judgment in favor of a father whose daughter had been seduced by a debtor.

The *Tinker* Court quoted *In re Freche*, which explained that the act in that case was malicious "because the injurious consequences which followed the wrongful act were those which might naturally be expected to result from it, and which [the debtor] must be presumed to have had in mind when he committed the offence [sic]."⁵⁹ The *Tinker* definition also established that the wrongfulness

of an act is not a subjective inquiry viewed from the debtor's perspective.⁶⁰ The *Tinker* Court continued quoting *In re Freche*, including language about "what any man of reasonable intelligence must have known to be contrary to his duty."⁶¹ The phrases "presumed to have had in mind" and "must have known" establish that the determination of whether an act is wrongful is from an objective perspective, not a subjective one.⁶² Determining wrongfulness from an objective perspective is supported further by the *Tinker* Court's summary of *United States v. Reed*, where it explained that "a malignant spirit or a specific intention to hurt a particular person is not an essential element."⁶³ For the injury of criminal conversation, the *Tinker* Court concluded that "personal and particular malice towards the husband as an individual need not be shown, for the law implies that there must be malice in the very act itself . . ."⁶⁴ Thus, based on the nature of certain acts, wrongfulness is implied.

2. *McIntyre v. Kavanaugh (1916)*

In 1916, the Court addressed the meaning of malice in the context of a conversion claim.⁶⁵ *McIntyre v. Kavanaugh* involved a debtor who was a partner at a financial brokerage.⁶⁶ The brokerage received some stock certificates to hold as security for a loan.⁶⁷ The brokerage sold the stocks without authority and used the sale proceeds for its own purposes.⁶⁸ The debtor did not participate in the brokerage's sale of the stock, but as a partner, he was "individually responsible for torts by [the brokerage]."⁶⁹ The *McIntyre* Court observed that "[i]f under the circumstances here presented the [brokerage] inflicted a wilful and malicious injury to property, of course, [the debtor] incurred liability for that character of wrong."⁷⁰

In determining whether the nature of the act was wrongful, the *McIntyre* Court noted that "[t]o deprive another of his property forever by deliberately disposing of it without semblance of authority is certainly an injury."⁷¹ The *McIntyre* Court rejected the argument that the phrase willful and malicious injury did not include conversion and found "no sufficient reason for such a

narrow construction.”⁷² The *McIntyre* Court then quoted *Tinker* and reaffirmed that “an act which is against good morals and wrongful in and of itself, and which necessarily causes injury . . . may be said to be done willfully and maliciously.”⁷³ Accordingly, even though the *McIntyre* Court never mentioned why the brokerage disposed of the stock, it concluded that “[t]he circumstances disclosed suffice to show a wilful and malicious injury to property for which [the debtor] became and remains liable to respond in damages.”⁷⁴

3. *Davis v. Aetna Acceptance Co. (1934)*

In 1934, the Court addressed the meaning of malice in another conversion case.⁷⁵ *Davis v. Aetna Acceptance Co.* involved a debtor who was a car dealer.⁷⁶ The debtor borrowed money to buy a car to resell, giving the lender a chattel mortgage and agreeing to hold the car as the property of the lender “for the purpose of storage, and not to sell, pledge, or otherwise dispose of it except upon consent in writing.”⁷⁷ The debtor then sold the car without the lender’s written consent.⁷⁸ The debtor testified that “notice of the transaction was given the same day to one of the [lender’s] officers.”⁷⁹ There was also testimony “support[ing] the inference that on many other occasions cars held upon like terms had been sold [by the debtor] without express consent.”⁸⁰

After citing *McIntyre*, the *Davis* Court explained that not every act of conversion amounted to a willful and malicious injury.⁸¹ The circumstances must be considered.⁸² In determining if the debtor’s act was sufficiently wrongful, the *Davis* Court clarified that “[t]here may be an honest, but mistaken belief, engendered by a course of dealing, that powers have been enlarged or incapacities removed. In these and like cases, what is done is a tort, but not a wilful and malicious one.”⁸³ Thus, the circumstances surrounding a debtor’s act influence the determination of wrongfulness.⁸⁴ The *Davis* Court concluded that

“a showing of conversion without aggravated features” was not sufficiently wrongful.⁸⁵

The *Tinker*, *McIntyre*, and *Davis* opinions established that an act is wrongful based on its nature having injurious consequences. It must also have aggravated features.⁸⁶ Wrongfulness is determined from an objective perspective based on the surrounding circumstances.⁸⁷

C. Scholarly Attention on the Meaning of Malicious Has Been Limited

Few scholars have grappled with the meaning of malice and none have focused on the degree of wrongfulness that should be required to constitute malice. Professor Charles J. Tabb wrote an influential article on collateral conversions in 1990.⁸⁸ He interpreted the then-existing circuit split on collateral conversions as having four different approaches: the special malice test, the implied malice test, the targeted-at-the-creditor test, and the totality-of-the-circumstances test.⁸⁹ In the context of collateral conversions, he proposed a “knowing violation” test which focused on whether a debtor knew that the conversion of the secured creditor’s collateral violated the creditor’s rights.⁹⁰

Some scholars have focused on breach of contract claims.⁹¹ Others argue that the best approach is the one taken by the Ninth Circuit, which requires the debtor’s conduct to constitute an intentional tort as defined by state law.⁹² One

author recommends narrowing the intentional tort requirement to only include intentional torts that are eligible for punitive damages under state law.⁹³ This approach has at least two weaknesses. First, state tort law varies significantly, both in the type of intentional torts and the standards for punitive damages. For example, at least five states prohibit punitive damages or allow them only under limited statutory grounds against particular defendants.⁹⁴ Two other states treat punitive damages as being only compensatory in nature.⁹⁵ Defining malicious to require torts eligible for punitive damages would prevent a uniform national standard for the exception to discharge. Secondly, the determination of the scope of the bankruptcy discharge, which is often delineated by the exceptions to discharge, is a matter of federal law and should not be given to the states.⁹⁶

Other commentators argue for uniform adoption of the *Tinker* definition of malicious but have not addressed what a wrongful act is.⁹⁷ This recommendation is not helpful because it provides no guidance on how wrongful an act must be in order to make it malicious. Circuit courts have struggled to consistently apply the *Tinker* definition of malicious. As one recently observed, “in the course of our research we have discovered to our surprise that courts are all over the lot”¹⁰⁵ Most circuit courts do not require personal hatred, spite, or ill-will.¹⁰⁶ Many allow malice to be constructive or implied based on the conduct of the debtor in the context of the surrounding circumstances.¹⁰⁷ But the circuit courts differ in how they treat the intent and wrongfulness components of the *Tinker* definition of malicious. This Part explores each aspect of the *Tinker* definition: intent, a wrongful act, and attribution.

A. *Intent Should Not Be an Element of “Malicious” Under § 523(a)(6)*

This section reviews non-bankruptcy law to illustrate that intent is commonly associated with malice. It then turns to bankruptcy law and evaluates the overlap of the “done intentionally”¹⁰⁸ element of malicious with the statutory term “willful” in § 523(a)(6).¹⁰⁹ The meaning of “willful” is explored as well as the circuit court struggle to construe the “done intentionally” element of malice given the intent-based meaning of the term “willful.” Although non-bankruptcy law typically utilizes malice as a label for some type of intent, this section recommends § 523(a)(6)’s statutory term “malicious” be construed to not require any intent because the statutory term “willful” already encompasses intent.

1. *Malice Usually Requires Intent Under Non-Bankruptcy Law*

This section traverses common-law murder, punitive damages, and defamation to show that under non-bankruptcy law, malice typically requires some type of intent.

a. *Malice and Common-Law Murder*

Criminal law utilizes malice as a label for various mental states that are related to the crime of murder. Under common law, murder is the unlawful killing of another with malice aforethought.¹¹⁰ The phrase “malice aforethought” has been called a “term of art,”¹¹¹ “juridical shorthand,”¹¹² an “arbitrary symbol,”¹¹³ and a “myster[y].”¹¹⁴ It encompasses several states of

b. *Malice and Punitive Damages*

Malice is often associated with punitive damages under tort law. In this context, malice commonly refers to some type of intent or state of mind, such as deliberate conduct that is outrageous or a disregard for the rights of another.¹²¹ Under the Restatement (Second) of Torts, “mere inadvertence, mistake, errors of judgment and the like, which constitute ordinary negligence”

to deter third persons from associating or dealing with him.”¹²⁸ A plaintiff must prove (1) an unprivileged communication to a third party (2) of a false and defamatory statement, (3) fault, and (4) damages.¹²⁹ In *New York Times Co. v. Sullivan*, the Supreme Court held that defamation cases involving a public official also require the statement be made “with ‘actual malice’—that is, with knowledge that it was false or with reckless disregard of whether it was false or not.”¹³⁰ A tort treatise explains:

Actual malice has become a term of art to provide a convenient shorthand for the New York Times standard of liability. It is quite different from the common law standard of “malice” generally required under state tort law to support an award of punitive damages. While the common law standard focuses on the defendant’s attitude toward the plaintiff, actual malice concentrates on the defendant’s attitude toward the truth or falsity of the material published.¹³¹

As the foregoing summary demonstrates, malice is used under non-bankruptcy law as an intent-based concept, with the required type of intent varying depending on the area of law.

2. Intent Is the Entire Characteristic of “Willful” Under § 523(a)(6)

Even though non-bankruptcy law typically defines malice to require some type of intent, the term “malicious” in § 523(a)(6) should not do so because intent is already a necessary element of the statutory term “willful.” Section 523(a)(6) excepts from discharge debts for “willful and malicious injury by the debtor.”¹³² The *Tinker* Court held that for bankruptcy purposes, malice requires a wrongful act that is “done intentionally.”¹³³ This “done intentionally”

requirement is confusing because it overlaps the term “willful” in § 523(a)(6).¹³⁴ This Part examines the meaning of willful in § 523(a)(6), looks at how the circuit courts have split on the way they treat intent as an element of malice, and then turns to the interplay between the statutory terms “willful” and “malicious.”

a. *The Statutory Term “Willful” Is Intent-Based and Requires a Deliberate or Intentional Injury*

The term “willful” in § 523(a)(6) is intent-based. The Supreme Court has interpreted this term on two occasions.¹³⁵ In 1904, the *Tinker* Court briefly noted that “willful” requires an act that is “intentional and voluntary.”¹³⁶ The remainder of the *Tinker* decision focused on the term malicious.¹³⁷ In 1998, the Supreme Court in *Kawaauhau v. Geiger* changed the willful standard to require “a deliberate or intentional *injury*, not merely a deliberate or intentional *act* that leads to injury.”¹³⁸

Kawaauhau involved a medical malpractice case where the debtor was a doctor.¹³⁹ The debtor provided treatment to a patient for a foot injury and admitted her to the hospital to attend to the risk of infection.¹⁴⁰ The debtor decided not to transfer the patient to an infectious disease specialist and discontinued all antibiotics because he believed the infection had subsided.¹⁴¹ The patient’s condition deteriorated and eventually her right leg was amputated below the knee.¹⁴² The patient was awarded a money judgment against the debtor for malpractice and the debtor filed bankruptcy.¹⁴³ The patient argued the malpractice award was debt for a willful and malicious injury because the debtor “intentionally rendered inadequate medical care . . . that necessarily led to [the patient’s] injury.”¹⁴⁴

The *Kawaauhau* Court explained that “[t]he word ‘willful’ in (a)(6) modifies the word ‘injury,’ indicating that nondischargeability takes a deliberate or intentional *injury*, not merely a deliberate or intentional *act* that leads to injury.”¹⁴⁵ The *Kawaauhau* Court continued: “the (a)(6) formulation triggers in

the lawyer's mind the category 'intentional torts,' as distinguished from negligent or reckless torts. Intentional torts generally require that the actor intend 'the consequences of an act,' not simply 'the act itself.'"¹⁴⁶ The Court clarified that willful does not include "situations in which an act is intentional, but injury is unintended, *i.e.*, neither desired nor in fact anticipated by the debtor."¹⁴⁷ Consequently, it held that "debts arising from recklessly or negligently inflicted injuries do not fall within the compass of § 523(a)(6)."¹⁴⁸

b. The Circuit Courts Have Split on the Way They Treat the "Done Intentionally" Element of Malicious

The circuit courts have split on the way they treat the "done intentionally" element of the *Tinker* definition of malicious.¹⁴⁹ Some circuits do not define malicious to require any type of intent. The First, Second, and Eleventh Circuits have dropped the "done intentionally" element from the *Tinker* definition of malicious.¹⁵⁰

This report was speaking only of the willful element of § 523(a)(6), not the malicious element. *See* Tabb, *supra* note 45, at 77 ("On its face, the statement obviously refers only to the 'willful' component of the discharge exception. wrongful act that is “done intentionally”¹⁶⁴ and then analyzed whether the debtor knew an injury was substantially certain to occur.¹⁶⁵

c. Intent Should Not Be an Element of “Malicious” Under § 523(a)(6) Because It Is Already Encompassed by the Statutory Term “Willful”

The circuit court split on whether intent should be a required part of malicious shows the need for guidance. The overlap between the term “willful” in § 523(a)(6) and the “done intentionally” element of malicious from *Tinker* has caused confusion in the circuit courts. The *Kawaauhau* Court interpreted willful to require a “deliberate or intentional injury.”¹⁶⁶ The *Tinker* definition of malicious requires a wrongful act that is “done intentionally.”¹⁶⁷ As the *Kawaauhau* Court pointed out, there is a meaningful difference between an intentional act that leads to injury and a “deliberate or intentional injury.”¹⁶⁸ The deliberate or intentional injury requirement of “willful” invariably subsumes the intentional act requirement of “malicious.” In other words, the intent required by the *Kawaauhau* Court’s 1998 interpretation of willful will always encompass the intent needed by the *Tinker* Court’s 1904 definition of malicious.

Accordingly, the “done intentionally” element of malicious should be abandoned because it no longer serves any function due to it being subsumed by the intentional injury element of willful. This approach reconciles the overlap on intent created by the *Tinker* Court’s definition of malicious with the later-decided definition of willful in *Kawaauhau*. It also provides an instructive construct for evaluating what malicious should mean. The *Kawaauhau* Court’s interpretation clarified that § 523(a)(6) is relying upon the term “willful” to fully embody intent, not malicious.

B. *Determining a Wrongful Act That Is Malicious*

Section 523(a)(6) requires a “willful *and* malicious injury.”¹⁶⁹ The *Tinker* Court’s definition of malicious requires “a wrongful act.”¹⁷⁰ Other than situations involving attribution (such as self-defense), intentionally injuring another is inherently a wrongful act. This suggests that the wrongful act element of malicious is modifying the statutory term “injury” in a way that makes it distinct from acts that are wrongful simply because the debtor intentionally caused an injury. In other words, there is a difference between a mere willful injury and the required willful and malicious injury. This section reviews some of the ways criminal and tort law identify wrongful acts and concludes that those methods will not work under § 523(a)(6)’s standard. It then evaluates how to determine wrongfulness that constitutes a malicious injury under bankruptcy law.

1. *Methods Used by Criminal and Tort Law to Identify Wrongful Acts*

One challenging aspect of the “willful and malicious injury” standard under § 523(a)(6) is that it is cause of action neutral, meaning it is not limited to identified criminal offenses or specific tort claims. Considering how criminal law and tort law identify offenses and claims is instructive.

Criminal law separates wrong from not wrong by “declar[ing] what conduct is criminal and prescrib[ing] the punishment to be imposed for such conduct.”¹⁷¹ Crimes are defined by identified acts or omissions along with specified mental states.¹⁷² For example, a person is guilty of false imprisonment if they “knowingly restrain[] another unlawfully so as to interfere substantially with [the other’s] liberty.”¹⁷³ The mental state of “knowingly” performs a function that is similar to the “willful” requirement of § 523(a)(6). The phrase “restrains another unlawfully so as to interfere substantially with his liberty” describes what specific conduct and result are required for the crime. The *Tinker* Court’s definition of malicious, which requires a “wrongful act,” is much broader than a single instance of specifically identified conduct. As presently defined by the *Tinker* Court, this breadth limits the ability of the term to perform its sorting function.

¹⁷³ MODEL PENAL CODE AND COMMENTARIES, Part II § 212.3 (AM. LAW INST. 1985) (defining false imprisonment).

Tort law provides limited assistance in modeling how to identify wrongful acts that are malicious. “[T]ortious conduct is twisted conduct, conduct that departs from the existing norm” and “torts are traditionally associated with wrongdoing in some moral sense.”¹⁷⁴ For many torts, the primary basis of liability is the fault or blameworthiness of the tortfeasor.¹⁷⁵ As one treatise observes: “The issue of fault . . . dominates most of tort law. Although fault may be defined quite differently according to the factual setting and relationships of the parties, courts are deeply involved with defining fault in a large proportion of all tort cases.”¹⁷⁶ Tort law uses three different principles to determine fault: intent, recklessness, and negligence.¹⁷⁷ Section 523(a)(6)’s willful requirement is intent-based and performs a function that is similar to torts based on intent¹⁷⁸

¹⁷⁴ DOBBS ET AL., *supra* note 128, at 4 (“The term ‘tort’ is derived from Latin roots meaning ‘twisted.’”); *see id.* at 3 (“A tort is conduct that constitutes a legal wrong and causes harm for which courts will impose civility liability.”); KEETON ET AL., *supra* note 2, at 2 (“Broadly speaking, a tort is a civil wrong, other than breach of contract, for which the court will provide a remedy in the form of an action for damages”); *Tort*, BLACK’S LAW DICTIONARY (10th ed. 2014) (defining a tort as “[a] civil wrong, other than breach of contract, for which a remedy may be obtained, usu[ally] in the form of damages; a breach of a duty that the law imposes on persons who stand in a particular relation to one another”).

¹⁷⁵ DOBBS ET AL., *supra* note 128, at 4–5 (“[F]ault remains the basis of tort liability and a marker of its limits in the overwhelming number of cases.”). *But see id.* at 5 (“In a few instances tort law imposes strict liability. Strict liability is liability without proof of fault . . . [where] liability may be imposed as a matter of legal policy irrespective of the defendant’s fault.”).

¹⁷⁶ *Id.* at 12. The fault principle has been explained in KEETON ET AL., *supra* note 2, at 608 as follows:

Unless other interests served outweigh intended harms and are treated as justification, conduct causing intended harms is blameworthy. When blameworthy conduct causes harms to others, the blameworthy actor ought, in general, to compensate for those harms. Similarly, unintended harms are ordinarily compensable if caused by conduct that involves undue risks—risks that, along with other costs, outweigh the usefulness of the conduct causing the harms. Conduct of this kind is socially undesirable and deserves to be classified as blameworthy.

¹⁷⁷ RESTATEMENT (THIRD) OF TORTS: LIABILITY FOR PHYSICAL AND EMOTIONAL HARM §§ 1–3 (AM. LAW INST. 2010). The terminology employed to administer these principles “possesses great elasticity.” Ellis, *supra* note 121, at 34 (“One source of tort law’s enduring vitality and resilience is the use of terminology possessing great elasticity. Ineffably vague terms such as negligence, duty, and the reasonable person, serve to minimize or at least to mask the inevitable tension between the often conflicting objectives the law seeks to further.”).

Of course, a mere showing that harm is

and recklessness.¹⁷⁹ Negligence is not directly analogous to § 523(a)(6) because it is impossible to have a negligent injury that is also willful.¹⁸⁰ But it is instructive to consider the allocation of fault based on negligence principles as a comparative methodology for determining a wrongful act that is malicious.

A person is negligent if they do not use reasonable care under the circumstances.¹⁸¹ In a negligence case, the tortfeasor does not desire to cause injury, and harm is a possibility but not a certainty.¹⁸² Negligence involves an objective perspective on risk “as it would be perceived by a reasonable person.”¹⁸³ Negligence principles determine fault by comparing the conduct in question to the conduct of a reasonable person.¹⁸⁴ This comparison method is helpful because, like § 523(a)(6), it is not tethered to specifically enumerated conduct.¹⁸⁵ The measure of deviation in negligence is embodied in the concept of breach—whether the defendant violated the appropriate standard of conduct.¹⁸⁶ Therefore, comparison is a useful method to identify wrongful conduct.

substantially certain to result from the actor’s conduct is not sufficient to prove intent; it must also be shown that the actor is aware of this.”).

¹⁷⁹ Recklessness requires conduct where: “(a) the person knows of the risk of harm created by the conduct or knows facts that make the risk obvious to another in the person’s situation, and (b) the precaution that would eliminate or reduce the risk involves burdens that are so slight relative to the magnitude of the risk as to render the person’s failure to adopt the precaution a demonstration of the person’s indifference to the risk.” *Id.* § 2 and cmt. a (“This Section, along with other materials in the three current Restatement Third projects, supersedes coverage of recklessness in Chapter 19 of the Restatement Second of Torts.”); *see also* RESTATEMENT (SECOND) OF TORTS § 500 (AM. 2. *A Malicious Injury Under Bankruptcy Law Should Require an Extraordinarily Wrongful Act in Order to Perform Its Sorting Function*

Defining malicious to require a mere “wrongful act” prevents the term from performing its sorting function. Under a generic definition, an act is wrongful if it is “a violation of a valid norm prohibiting or requiring specific conduct.”¹⁸⁷ An act can also be described as wrongful if it harms the legitimate interests of another.¹⁸⁸

Two problems arise from defining malicious to include acts that involve any degree of wrongfulness. First, allowing any degree of wrongfulness to satisfy the “malicious” term in § 523(a)(6) makes the term itself meaningless because wrongful acts are already encompassed by “willful” injuries. This is because it is inherently wrong to deliberately or intentionally injure another. In order for the “malicious” modifier of injury to have separate significance, it must mean something that is not already encompassed by the term “willful.”

The second reason malicious should not be defined as acts involving any degree of wrongfulness goes to the nature of an exception to discharge under bankruptcy law. From a policy perspective, an exception to discharge should not be interpreted in a way that results in the exception applying to all debts.¹⁸⁹ The exceptions to discharge in § 523 demonstrate a congressional decision that the interests of certain creditors in recovering debt payment outweigh the interests of debtors in obtaining a fresh start.¹⁹⁰

¹⁸⁷ GEORGE P. FLETCHER, *RETHINKING CRIMINAL LAW* 472 (1978); see H.L.A. HART, *THE CONCEPT OF LAW* 86 (Paul Craig ed., 3d ed. 2012) (“Rules are conceived and spoken of as imposing obligations when the general demand for conformity is insistent and the social pressure brought to bear upon those who deviate or threaten to deviate is great. Such rules may be wholly customary in origin: there may be no centrally organized system of punishments for breach of the rules; the social pressure may take only the form of a general diffused hostile or critical reaction which may stop short of physical sanctions. It may be limited to verbal manifestations of disapproval or of appeals to the individuals’ respect for the rule violated; it may depend heavily on the operation of feelings of shame, remorse, and guilt.”).

¹⁸⁸ JULES L. COLEMAN, *RISKS AND WRONGS* 331–32 (1992) (stating losses are wrongful if they result from conduct harmful of legitimate interests and that wrongdoing consists of unjustifiable departures from the relevant standards of permissible behavior). From a moral basis, Professor H.L.A. Hart suggested rules that are essential to the survival of any society are “those forbidding, or at least restricting, the free use of violence, rules requiring certain forms of honesty and truthfulness in dealings with others, and rules forbidding the destruction of tangible things or their seizure from others.” HART, *supra* note 187, at 171–72 (acknowledging that moral rules “may vary from society to society or within a single society at different times”).

¹⁸⁹ *Chapman v. Forsyth*, 43 U.S. 202, 208 (1844) (interpreting a different exception to discharge and noting that one of the litigant’s proposed interpretations “would have left but few debts on which the law [meaning a discharge of debt] could operate”).

¹⁹⁰ *Cohen v. de la Cruz*, 523 U.S. 213, 222 (1998) (“The various exceptions to discharge in § 523(a) reflect a conclusion on the part of Congress ‘that the creditors’ interest in recovering full payment of debts in these categories outweigh[s] the debtors’ interest in a

The exceptions to discharge in § 523 can be divided into two categories: those based on the debt's importance to society and those based on a debtor's bad conduct. Examples of debts that are important to society include debts relating to taxes,¹⁹¹ domestic-support obligations,¹⁹² government fines,¹⁹³ educational loans,¹⁹⁴ and orders of restitution in criminal cases.¹⁹⁵ The very nature of these debts is significant enough to outweigh both the public and private interests in providing debtors a fresh start. Examples of exceptions that arise from certain types of bad conduct by a debtor include debts obtained by false pretenses or actual fraud,¹⁹⁶ embezzlement,¹⁹⁷ or larceny.¹⁹⁸ The exception to discharge for "willful and malicious injury" in § 523(a)(6) is based on the bad conduct of the debtor. As such, the bad conduct should be bad enough to justify the debt being excepted from discharge, not just conduct that involves any degree of wrongfulness.

Debtor conduct that involves a degree of wrongfulness that is minor, tolerable, or expected should not be considered malicious. In other words, slightly wrongful conduct should still be discharged in bankruptcy. A criminal law scholar distinguished wrongful conduct from wrongdoing by explaining that "[m]urder and larceny are equally wrongful in the same way that both violate legal norms. But murder is a greater wrong—a graver case of wrongdoing—than larceny. Determining the degree of wrongdoing is obviously a subtle problem of moral judgment."¹⁹⁹

Courts should stop defining malicious to require a mere "wrongful act" because doing so prevents the term from performing its sorting function. Instead, malicious in § 523(a)(6) should require an "extraordinarily wrongful

complete fresh start." (quoting *Grogan v. Garner*, 498 U.S. 279, 287 (1991)); *Bruning v. United States*, 376 U.S. 358, 361 (1964) (noting the predecessor to section 523(a) "[was] not a compassionate section for debtors" because "it demonstrate[d] congressional judgment that certain problems . . . override the value of giving the debtor a wholly fresh start"); see also Jonathon S. Byington, *The Fresh Start Canon*, 69 FLA. L. REV. 115, 117 (2017) (describing a rival policy to the fresh start, that "discharge of debt is a selectively conferred privilege" and that the Bankruptcy Code "manifests the 'discharge restrictions' policy through provisions that deny a debtor a discharge altogether under § 727(a) or except specific, individual debts from discharge under § 523(a)").

act.”²⁰⁰ This standard would allow the definition of malicious to exclude acts that have a small degree of wrongfulness. Debts arising from such minimally wrongful acts, even where the injury was intended by the debtor, should still be discharged. To hold otherwise would except from discharge a mere willful injury instead of the required willful and malicious injury. Whether an act is extraordinarily wrongful should be assessed from an objective standard.²⁰¹ Requiring an extraordinarily wrongful act changes the focus of the sorting function. It centers the analysis on whether an act has a substantial degree of wrongfulness instead of the unhelpful standard of whether an act was merely wrong or not. Interpreting the term in this manner gives separate meaning to both of the adjectives in § 523(a)(6): willful and malicious. It also allows the exception to discharge to properly perform its sorting function.

C. The Definition of Malicious Should Retain the Attributive Function of the Requirement That the Act Be “Without Just Cause or Excuse”

The final element of the *Tinker* definition of malicious requires the wrongful act be done “without just cause or excuse.”²⁰² This element relates to attribution. Attribution is about whether a person is responsible for their wrongful conduct. In criminal law, a person may have engaged in wrongful conduct but because they are insane or an infant they may not be accountable for an offense.²⁰³ A privilege like self-defense is another example of attribution.²⁰⁴ In limited situations, wrongful acts may be justified to avoid some other injury. The portion of the *Tinker* Court’s definition of malicious that relates to whether there was just cause or excuse goes to attribution and should be retained.

IV. CONCLUSION

The definition of malicious in § 523(a)(6) needs to change. In order to harmonize the *Tinker* Court’s definition of malicious with the *Kawaauhau* Court’s definition of willful, courts should stop construing malicious to require intent. This means the “done intentionally” element of the *Tinker* Court’s definition of malicious should be eliminated. In addition, the “wrongful act”

²⁰⁰ There is a precedential basis for a judicial adoption of this elevated standard. In determining whether a debtor’s acts were sufficiently wrongful, the *Davis* Court suggested the wrongful act needs to have “aggravated features.” *Davis v. Aetna Acceptance Co.*, 293 U.S. 328, 333 (1934).

²⁰¹ See *supra* Part II.B.1 (stating that determination of whether an act is wrongful is made from an objective perspective, not a subjective one). element of the *Tinker* Court's definition of malicious should be changed to require an "extraordinarily wrongful act." This adjustment allows the term to perform its sorting function. Accordingly, the term "malicious" in § 523(a)(6) should require an extraordinarily wrongful act that is done without just cause or excuse.
