
Handbook of Chemistry and Physics, 44th edition. The Chemical Rubber Co., Cleveland, Ohio.
3,568 p. \$12.00 in the U. S.

The 44th edition, just out, is to be the last of the old handy format. The next edition will be the size of the volume of Tables for the Identification of Organic Compounds, which was issued at the same time as the 42nd edition. The 44th edition presents much new data, including a Periodic Chart, a listing of the atomic weights of the elements, and recalculation of the fundamental constants, based upon the new atomic weight scale.

THOMAS H. LANGLOIS
