

Our Host

One of the nation's early coeducational liberal arts colleges, Heidelberg College was founded in Tiffin in 1850 by the Reformed Church in the United States. Heidelberg today is an independent Ohio corporation related to, but not controlled by, the United Church of Christ.

Heidelberg offers three degrees - - bachelor of arts, bachelor of science and bachelor of music - - and about 25 major areas of concentration. Among the majors are biology, chemistry, environmental biology, mathematics, physics, and psychology. Computer science is offered as a second major. Geology and geography courses are included in the science curriculum. In addition, the College has strong majors in areas such as American studies, education, English, history, music, languages and religion.

Preprofessional programs offer preparation for further study in law, medicine, dentistry, engineering, medical technology, veterinary medicine, nursing, and forestry. Co-operative programs involving study at Heidelberg and other institutions include agriculture, engineering, nursing, and medical technology.

A number of domestic and foreign off-campus programs and study opportunities are available, including the Junior Year or Semester at Heidelberg University in Germany.

For the last decade students in the natural sciences have been involved in the Heidelberg Water Quality Laboratory, which deals with aquatic ecosystems research in Ohio streams. A total of about \$1.4 million in grants from governmental and private agencies has provided complete support for the laboratory since 1968.

Heidelberg has received seven National Science Foundation grants for Student-Originated-and-Controlled (SOS) summer projects and a number of other federal grants for research by students and faculty members.

Heidelberg, which on Oct. 1, 1978 had an overall enrollment of 916 students from 23 states, the District of Columbia, and foreign countries, occupies a 110-acre campus about a half-mile from downtown Tiffin (population 22,000). The old and new in architecture is reflected in the College's 25 buildings, ranging from the Greek Revival lines of 127-year-old Founders Hall to the contemporary and circular Beeghly Library. The library maintains nearly 132,000 volumes in its active collection.

Of Heidelberg's total of 8,311 graduates since the first commencement in 1854, one-third have been produced in the last dozen years and about 60 per cent in the last quarter century. An estimated 80 per cent of all graduates of the College are alive and on the rolls of the Heidelberg Alumni Association.

Heidelberg College cordially welcomes as its guests the men and women attending this very important meeting of The Ohio Academy of Science.

You're Invited To Visit

The Water Quality Laboratory
and Mineral and Biology Museums

You are invited to visit the Water Quality Laboratory on the lower level of Bareis Hall and also the Heidelberg mineral and biology museums on the third floor and attic of Laird Science Hall. With more than 5,000 specimens cataloged and displayed, the Charles H. Jones Collection is considered one of the outstanding smaller collections of minerals in the United States.

Local Section Hosts

Edwin T. Ashworth, Howard W. Hintz, Co-Chairmen

Robert C. Murray	A. Zoology
Percy L. Lilly	B. Plant Sciences
Edwin T. Ashworth	C. Geology
George Barlow	D. Medical Sciences
Raymond L. Wise	E. Physics and Astronomy
Herman Williams	F. Geography
John W. Groce	G. Chemistry
Howard W. Hintz	H. Science Education
John H. Bing	I. Anthropology and Sociology
David B. Baker	J. Conservation
Gayle H. Joyce	K. Genetics and Cell Biology
Martin A. Reno	L. Mathematics and Computer Science
Leon M. Wise	M. Psychology
Melvin F. Casler	N. Junior Academy
William F. Steele	O. Engineering
Barbara Howe	P. Planning and Administrative Sciences
William T. Wickham	Q. Economics
Bayliss L. Prater	R. Ecology

Housing

TIFFIN

L & K Tiffin Motel (419) 447-7411
