#### WEAO NOW IN OPERATION

The new broadcasting station at Ohio State University is completed, and is transmitting regular programs. The change over was made March first.

The power of the new station is the same, but the apparatus and antenna system are entirely new, and built to secure the greatest possible efficiency. The station was designed by R. C. Higgy, University Radio Engineer, and incorporates features that place Ohio State at the top in Radio Broadcasting. An article describing the new station will appear in the next issue.
